**Confessions of a Credit Junkie** Beverly Harzog,2013-11-25

Credit card expert Beverly Harzog shares how she went from being a credit card disaster to a credit card diva. When Beverly got out of college she spent the next 10 years racking up debt on seven credit cards. Credit card limits she believed were merely guidelines certainly not anything to be taken seriously especially if she was in dire need of a new pair of shoes. The fact that she was a CPA at the time adds an ironic twist to the credit quagmire she slowly descended into. In *Confessions of a Credit Junkie* Beverly candidly details her own credit card mishaps and offers easy to follow advice often with a touch of Southern humor to help others avoid them. In this much needed book you'll learn How to use the Credit Card Personality Quiz to choose the right credit cards. The seven ways to use a credit card to rebuild credit. How to get out of debt using a balance transfer credit card and pay zero interest while doing it. Credit card strategies to save a bundle on groceries gas and more. Anyone in debt will benefit from the down to earth practical tips Beverly offers

[Everyday Thinking](#) Stanley

Woll,2001-07-01 Appropriate as a textbook for courses in cognitive psychology or social cognition. *Everyday Thinking* reviews the rapidly growing literature on cognition in naturalistic settings. It differs from other textbooks in that where possible it focuses on thinking in real world settings rather than in controlled laboratory settings and provides detailed treatments of each of the following topics: how we form impressions of and represent persons in memory; how we recognize and represent faces; how we reason in our day to day lives and go about solving everyday problems; how we make judgments and decisions; how we encode memories of events both for future action and for our own life histories; and what are some of the implications of everyday knowledge and cognition for education and instruction. This book presents the theoretical positions and research evidence on each of these topics and examines the generally unexplored connections among them. As a result this book presents the study of cognition in a more relevant form and in a context that readers can more readily apply to their own lives
