

The diagram illustrates the Microsoft Active Directory (AD) architecture. At the top center is a blue folder icon containing a white Windows logo. Below the folder, the text "Microsoft Active Directory" is written in white. A central vertical line connects the folder to a network of nodes below. The network consists of several blue circular nodes of varying sizes, some with white centers and others with grey centers. These nodes are interconnected by grey lines, forming a cloud-like structure that represents the distributed nature of the directory service.

Break the vicious circle of designs perpetuating the errors of the past and just click next and accept the defaults  
implementations preventing a secure and reliable future This book looks at the typical patterns and antipatterns in Active  
Directory AD design deployment and operations and provides an approach to building and operating AD that is based on  
engineering analyzing and fulfilling requirements rather than design formulating requirements The book starts with an  
historical overview of AD and its future 25 years later You then learn about the challenges that organizations running AD are  
facing today followed by understanding how to avoid them while learning modern requirements for more efficient and  
effective AD performance After that you go through business requirements influencing the AD topology along with ways to  
engineer information lookup to protect high value objects The book looks at two main protocols and the many dialects that  
AD offers to engineer an authentication service that fulfills modern requirements while leaving insecure legacy  
configurations behind Managing AD from both the security and usability perspectives is discussed next in the book Building  
operating and transitioning to a modern AD is demonstrated in detail The book guides you with the next steps of your journey  
to achieve a secure and reliable AD After reading this book you will be able to bridge the gap between the two approaches by  
analyzing real world business requirements explaining the decision making process in both design and engineering and  
ultimately providing concrete engineering guidelines for typical implementation scenarios What Will You Learn Build a  
modern Active Directory AD leaving behind design antipatterns that are not valid anymore Build a secure by design AD and  
accommodate legacy technology without compromising the overall security Understand advanced AD functionality such as  
controlling object visibility and partitioning Kerberos authentication by Authentication Policies Operate a modern AD react to
