Logic, Methodology and Philosophy of Science IX D. Prawitz, B. Skyrms, D. Westerståhl, 1995-01-10 This volume is the product of the Proceedings of the 9th International Congress of Logic Methodology and Philosophy of Science and contains the text of most of the invited lectures Divided into 15 sections the book covers a wide range of different issues The reader is given the opportunity to learn about the latest thinking in relevant areas other than those in which they themselves may normally specialise

Handbook of Risk Theory Sabine Roeser, 2012 Risk has become one of the main topics in fields as diverse as engineering medicine and economics and it is also studied by social scientists psychologists and legal scholars But the topic of risk also leads to more fundamental questions such as What is risk What can decision theory contribute to the analysis of risk What does the human perception of risk mean for society How should we judge whether a risk is morally acceptable or not Over the last couple of decades questions like these have attracted interest from philosophers and other scholars into risk theory This handbook provides for an overview into key topics in a major new field of research It addresses a wide range of topics ranging from decision theory risk perception to ethics and social implications of risk and it also addresses specific case studies It aims to promote communication and information among all those who are interested in theoretical issues concerning risk and uncertainty This handbook brings together internationally leading philosophers and scholars from other disciplines who work on risk theory The contributions are accessibly written and highly relevant to issues that are studied by risk scholars We hope that the Handbook of Risk Theory will be a helpful starting point for all risk scholars who are interested in broadening and deepening their current perspectives
