*An Applied Guide to Process and Plant Design* Sean Moran, 2019-06-12 An Applied Guide to Process and Plant Design 2nd edition is a guide to process plant design for both students and professional engineers. The book covers plant layout and the use of spreadsheet programs and key drawings produced by professional engineers as aids to design subjects that are usually learned on the job rather than in education. You will learn how to produce smarter plant design through the use of computer tools including Excel and AutoCAD What If Analysis statistical tools and Visual Basic for more complex problems. The book also includes a wealth of selection tables covering the key aspects of professional plant design which engineering students and early career engineers tend to find most challenging. Professor Moran draws on over 20 years experience in process design to create an essential foundational book ideal for those who are new to process design compliant with both professional practice and the IChemE degree accreditation guidelines. Includes new and expanded content including illustrative case studies and practical examples. Explains how to deliver a process design that meets both business and safety criteria. Covers plant layout and the use of spreadsheet programs and key drawings as aids to design. Includes a comprehensive set of selection tables covering aspects of professional plant design which early career designers find most challenging.

**Remote Sensed Data and Processing Methodologies for 3D Virtual Reconstruction and Visualization of Complex Architectures** Diego Gonzalez-Aguilera, Fabio Remondino, Pablo Rodríguez-Gonzálvez, Erica Nocerino, 2018-09-28 This book is a printed edition of the Special Issue Remote Sensed Data and Processing Methodologies for 3D Virtual Reconstruction and Visualization of Complex Architectures that was published in *Remote Sensing* [Shipping World & Shipbuilder](#), 2005 *An Experimental Study of Structural Behaviour* University of Melbourne. School of Architecture and Building, 1965 **Handbook of Structural Life Assessment** Raouf A. Ibrahim, 2017-03-29 This important self contained reference deals with structural life assessment SLA and structural health monitoring SHM in a combined form. SLA periodically evaluates the state and condition of a structural system and provides recommendations for possible maintenance actions or the end of structural service life. It is a diversified field and relies on the theories of fracture mechanics, fatigue damage process and reliability theory. For common structures their life assessment is not only governed by the theory of fracture mechanics and fatigue damage process but by other factors such as corrosion, grounding and sudden collision. On the other hand SHM deals with the detection, prediction and location of crack development online. Both SLA and SHM are combined in a unified and coherent treatment. **Guide to Investigation of Structural Failures** Jack R. Janney, 1986-01-01 Prepared by the Research Council on Performance of Structures of ASCE. This report contains guidelines for conducting an investigation into the causes of a structural failure or collapse. Topics include members of the investigative team and their responsibilities, recommended procedure for site visits, accumulation and recording of data, reporting procedures and checklists of preparation and materials needed for each step. Common structural types are described.
