

As a part of this you will create an environment inside of AWS Cloud. You have access to this through the same location where you are accessing the tutorial material at the moment. As you will notice you do not have unlimited access to these and your individual limit is given at the top of the screen. If you use the sandbox environment you are limited on your time to 3 hours so do work on what you are doing and recreate the design which you specified. At the end of 3 hours your work will be deleted automatically by the system. To resolve this issue we recommend that you use the **AWS Learner labs** which we have provided for you separately. In the AWS Learner lab you have \$100 of credit which you can spend and you can work on an environment for 4 hours. At the end of the 4 hours all of your work will still be saved and you simply need to stop and start again the environment. There is no requirement to write code for this assignment; you are simply building the infrastructure so please just get appropriate screen grabs of the console to show this setup, with additional suitable screens to assist the reader. The screen grabs should be put into the **Appendix** at the end of the report and with this discuss the different options which you have chosen and why in the setup.
