INDEX TO VOLUME 1 UNITED STATES BUREAU OF STANDARDS, 2022 *Bulletin of the Bureau of Standards, Vol. 5 (Classic Reprint)* S. W. Stratton, 2018-03-22 Excerpt from Bulletin of the Bureau of Standards Vol 5 A great many formula have been given for calculating the mutual and self inductance of the various cases of electrical Circuits occurring in practice Some of these formula have subsequently been Shown to be wrong and of those which are correct and applicable to any given case there is usually a choice because of the greater accuracy or greater convenience of one as compared with the others For the convenience of those having such calculations to make we have brought together in this paper all the formula with which we are acquainted which are of value in the calculation of mutual and self inductance particularly in nonmagnetic circuits where the frequency of the current is low enough to assure sensibly uniform distribution of current A considerable number of formula which have been shown to be unreliable or which have been replaced by others that are less complicated or more accurate have been omitted although in most cases we have given references to such omitted formula Where several formula are applicable to the same case we have pointed out the especial advantage of each and indicated which one is best adapted to precision work In the second part of the paper we give a large number of examples to illustrate and test the formula Some of these examples are taken from previous papers by the present authors but many are new We have given the work in many cases in full to serve as a guide in such calculations in order to make the formula as useful as possible to students and others not familiar with such calculations and also to facilitate the work of checking up the results by anyone going over the subject We have been impressed with the advantage of this in reading the work of others About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Bulletin of the Bureau of Standards, Vol. 7 S. W. Stratton, 2017-12-21 Excerpt from Bulletin of the Bureau of Standards Vol 7 1911 This method of reading and recording settings is objectionable because it consumes considerable time and involves the liability of error both in reading and in recording besides unnecessarily fatiguing the eye by alternate reading of photometer screen and scale About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that

Bulletin of the Bureau of Standards, Vol. 2 S. W. Stratton,2016-11-06 Excerpt from Bulletin of the Bureau of Standards Vol 2 Issued June 15 1906 Of the two more recent investigations Ferry verified the law for white light but found quite large errors when the light transmitted through the rotating sectored disk was of a bluer quality than that incident on the other side of the photometer screen His method consisted in mounting two sources of light on the photometer bench one at each end and interposing in the path of the rays from one source a rotating sectored disk with variable openings The disk was mounted on a movable support so that it could readily be introduced in the path of the rays and quickly removed again after a reading had been made In this way using as sources two 16 cp incandescent electric lamps of approximately the same color he found the law to be verified for all openings of the sector down to a total angle of Moreover as the voltage on the lamps was changed from 70 to 120 volts provided the two lamps were changed together the result was the same as before He then mounted a 50 cp incandescent lamp at the disk end of the bar and a 16 cp lamp at the other end and found as before that Talbot s law is verified if the two lamps are of approximately the same color If however the 50 cp lamp was burned at a voltage much higher than the normal or if a piece of slightly tinted blue glass was interposed in the path of the rays intercepted by the sectored disk a very appreciable deviation from Talbot s law was introduced when the opening of the disk was less than the deviation increasing as the opening was made smaller Using successively an enclosed arc lamp and a lime

light on the sectored disk side of the photometer and an incandescent lamp on the other side he obtained deviations amounting to 15 per cent and 10 per cent respectively at the deviation in each case being approximately zero when the opening of the disk was greater than In all cases in which deviations from the law were found the disk let through less light than that demanded by Talbot's law About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

BULLETIN OF THE BUREAU OF STANDARDS

S. W. STRATTON, 2022 *Bulletin of the Bureau of Standards, 1911, Vol. 7 (Classic Reprint)* S. W. Stratton, 2016-09-27

Excerpt from Bulletin of the Bureau of Standards 1911 Vol 7 Methods like that first described by Campagne 1 and found with little variation from the original in many textbooks on steel analysis The hydrochloric acid ferric solution of the steel is extracted with ether which removes most of the iron leaving the vanadium in the aqueous layer This portion is evaporated to dryness and the operation repeated two or three times with fresh portions of hydrochloric acid The latter reduces the vanadium to the quadrivalent state the final evaporation is made with sulfuric acid and is continued until fumes are given off strongly The solution is then titrated against permanganate About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

BULLETIN OF THE

BUREAU OF STANDARDS, 1907, DEPARTMENT OF COMMERCE AND. LABOR,2022

Bulletin of the Bureau of Standards, Vol. 3 S. W. Stratton,2017-07-10 Excerpt from Bulletin of the Bureau of Standards Vol 3 Issued April 1907 If the area be subdivided into 72 equal squares it may be taken to represent the section of a circular coil wound with square wire the latter being insulated by a covering of infinitesimal thickness The self inductance of such a coil is n times as great as that of a single ring occupying the same space Hence by inserting 2 as a factor in the expression previously derived the formula for the self inductance of a coil of wire of 7 turns mean radius a axial width b and radial depth 5 was derived by Weinstein Stefan put the formula into more convenient form for calculation by combining several terms which depend only on the ratio of b to a into two terms y and y the values of which could be taken from tables prepared by him for the purpose Stefan's formula is as follows About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Market Organization Roland S. Vaile,1930 Excerpt from Market

Organization An Introductory Course The authors have had three reasons in mind for undertaking the present work i the dynamic situation with respect to marketing requires frequent up to date presentation 2 the architectural design of the book is a new and we believe a useful approach to a course in marketing 3 current writings in the field of marketing are so voluminous and contradictory that a winnowing of some of the wheat from some of the chaff has seemed worth while In all marketing there is a group of functions which must be performed The method of performance will differ somewhat for different commodities but an appreciation of the functions seems essential to an understanding of marketing Variations between the institutions which grow up for the handling of each commodity result from these differences between the commodities themselves About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
