*Bulletproof* Brett M. Ward,2007-03 Non Fiction Fantasy Why do humans use less than one one millionth of their total mental potential Is there anything stopping us from using the rest And if not how do we use the rest but most curiously why do we have so much and use so little And if our body s cells are constantly being replaced why do we grow old and die a contradiction of that restoration process The answers to these questions are what this book is about Obsessed with finding the answers a research scientist spent his entire life digging until he unexpectedly found himself looking into history including even the Bible for clues He then had to subject that book itself the Bible to the scientific method of analysis to either validate it or invalidate it as a creditable source This is not a faith based work but includes a clinical scientific analysis to separate the nebulous world of religious views from palpable truth and reality with a complete disregard for political correctness The discoveries made here are so utterly amazing that the way it has to be told is in an autobiographical story form following the step by step developments of the discovery process This is a true story and this brief statement vastly understates the issues at hand
