**Structured Luck** Onoso Imoagene, 2023-04-03 The Diversity Immigrant Visa Program is a lottery that awards winners from underrepresented countries the chance to apply for legal permanent residence in the United States Most lottery winners think of themselves as lucky viewing the win as an opportunity to pursue better lives for themselves and their families In *Structured Luck* sociologist Onoso Imoagene uses immigrants stories to show that while the visa program benefits many recipients the program s design can also lead to exploitation in their countries of origin and reduced potential once they are in the United States Combining ethnographic observation in Africa and interviews with immigrants their family members and friends from Ghana and Nigeria Imoagene demonstrates that the visa program is a process of structured luck from how people hear about the lottery who registers for it and who participates in it to the application requirements for the visa In Ghana and Nigeria people often learn about the lottery through friends colleagues or relatives who persuade them to enter for the perceived benefits of receiving a visa opportunities for upward mobility permanent legal status and the ability to bring along family members Though anyone can enter the lottery not everyone who wins obtains a visa The visa application process requires proof of a high school diploma or artisan skills a medical exam a criminal background check an interview with U S consular officers and payment of fees Such requirements have led to the growth of visa entrepreneurs who often charge exorbitant fees to steer immigrants through the process Visa recipients who were on track to obtain university degrees at home often leave in the middle of their studies for the United States but struggle to continue their education due to high U S tuition costs And though their legal status allows them to escape the demoralizing situations that face the undocumented these immigrants lack the social support that the government sometimes provides for refugees and other migrants Ultimately Imoagene notes the real winner of the visa lottery is not the immigrants themselves but the United States which benefits from their relatively higher levels of education Consequently she argues the U S must do more to minimize the visa program s negative consequences *Structured Luck* illuminates the trauma resilience and determination of immigrants who come to the United States through the Diversity Visa Program and calls for the United States to develop policies that will better integrate them into society

**Environmental Law Across Cultures** Kirk W. Junker, 2019-12-09

This book provides a practical functional comparison among various institutions tools implementation practices and norms in environmental law across legal cultures This is a new approach that focuses on the act of comparison looking at legal practice from the ground up including the perspective of citizens Most literature on comparative environmental law either focuses on a two way comparison of state jurisdictions or simply juxtaposes environmental features of two or more state jurisdictions without engaging in any analysis of the comparison However this book treats legal cultures as the objects of comparison as it provides practical comparisons among various institutions tools and norms in environmental law The arrangement and organisation of the material reverses the more traditional presentation of comparative environmental law

as a series of countries within which separate descriptions are respectively presented In this book the reader is presented with environmental legal themes with examples and case studies drawn from various cultures that are compared in order to help understand the theme Case studies draw on the authors experiences in a range of legal cultures including in Australia Brazil China Chile Ethiopia Germany India Nigeria Slovakia and the USA The comparative nature of the book allows domestic professionals to develop skills to enable them to understand and advocate broader contexts for clients and helps students become more aware of specific legal systems while questioning why their own system functions or does not function as it does The book is aimed at advanced undergraduate and postgraduate students of environmental law as well as researchers and practitioners
