Bushmeat And Livelihoods Wildlife Management And Poverty Reduction:

Bushmeat and Livelihoods Glyn Davies, David Brown, 2008-04-15 This book explores the links between bushmeat and livelihoods in Africa with a focus on the human dimension of the debate Assembles biological social and economic perspectives that illuminate the bushmeat debate Features a series of case studies that explore what species survive different intensities of bushmeat hunting and trapping Examines the shape and size of household bushmeat consumption and market trading Reviews governance and institutional impacts on wildlife management lessons learned from agriculture forest plant product and development sectors and perspectives from Asia and Latin America Provides an excellent resource for students and policy makers in wildlife management conservation and development Ignoring Nature No More Marc Bekoff, 2013-06-01 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In *Ignoring Nature No More* Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike *Shifting the Paradigms for Sustainable Wildmeat Use in Tropical and Sub-Tropical Regions* Nathalie Van Vliet, Robert Nasi, 2020-12-14 In Tropical and sub tropical Range States wildmeat is an important source of nutrition and income but current extraction levels of vulnerable taxa are considered unsustainable As such wildmeat use is often seen as problematic for wildlife conservation From a development perspective balancing the nutritional needs of people who depend on wildmeat with biodiversity conservation is the greatest challenge But why can't wildmeat use be seen as an ally for conservation Most analysis of wildmeat use have framed the problem around a rather simplistic paradigm where wildmeat use is unsustainable and should therefore be reduced or stopped to ensure wildlife conservation Indeed until the early start of this century most research efforts have been rooted in the biological disciplines focused on quantifying the magnitude of the trade and

measuring its level of destruction on wildlife species and ecosystems This most often led to the institution of prohibitive policies intended for the protection of the wild resources such as separating people from wildlife expanding tightly managed protected area networks blanket criminalization of wild meat hunting and increasing enforcement and interdiction measures More recently based on the elucidation of the role of wild meat in human livelihoods some practitioners defend the idea that consumptive uses of wildlife are the only way to save it in the long run

Tropical Conservation A. Alonso Aguirre, Raman Sukumar, 2017 *Tropical Conservation Perspectives on Local and Global Priorities* is intended to be a key resource on the biodiversity conservation crisis in the tropics and subtropics for university professors university students researchers practitioners in grassroots local community organizations technical staff of non profit conservation and development organizations wildlife managers and other technicians in the resource extraction industries government and policy makers This book provides unique exposure to the experiences of Latin American Asian and African conservation scientists working on the ground

Humans and Animals Julie Urbanik, Connie L. Johnston, 2017-01-26 An engaging and at times sobering look at the coexistence of humans and animals in the 21st century and how their sometimes disparate needs affect environments politics economies and culture worldwide There is an urgent need to understand human animal interactions and relations as we become increasingly aware of our devastating impact on the natural resources needed for the survival of all animal species This timely reference explores such topics as climate change and biodiversity the impact of animal domestication and industrial farming on local and global ecosystems and the impact of human consumption of wild species for food entertainment medicine and social status This volume also explores the role of pets in our lives advocacy movements on behalf of animals and the role of animals in art and media culture Authors Julie Urbanik and Connie L Johnston introduce the concept of animal geography present different aspects of human animal relationships worldwide and highlight the importance of examining these interconnections Alphabetical entries illustrate key relationships concepts practices and animal species The book concludes with a comprehensive appendix of select excerpts from key primary source documents relating to animals and a glossary

Links Between Biodiversity Conservation, Livelihoods and Food Security Sue Mainka, Mandar Trivedi, 2002 The global use of wild animals for meat is now the primary illegal activity in many protected areas and growing human populations and a lack of livelihood options suggest that demand for wild meat is likely to continue to rise This Occasional Paper contains the background information presented to participants at a workshop jointly organized by IUCN FAO and TRAFFIC in Yaound Cameroon The workshop aimed to forge functional links among the various stakeholders concerned with the unsustainable use of wild fauna for food and it contains the communiqué and a summary of the discussions related to problems and solutions

Wildlife Research, 2011 *Trading Nature* Dilys Roe, 2008 The report addresses how societies can reconcile these contradictions and minimize the risks posed by wildlife trade Critical factors include the establishment of appropriate ownership and tenure regimes for wildlife the development of means to

enhance wild production and the use of certification processes to identify wildlife goods that are derived sustainably Cf Forward

Conservation and Use of Wildlife-based Resources Robert Nasi, 2008 The importance of wildlife Wildlife and sustainable livelihoods The bushmeat crisis Synergistic factors affecting the sustainability of hunting Linkages between bushmeat harvest and other available protein sources Lessons learned and recommendations Parliamentary Debates (Hansard). Great Britain. Parliament. Poverty, Health, and Ecosystems Paul Steele, Gonzalo Oviedo, David S. McCauley, 2007 The harvest of wildlife for bushmeat and traditional medicine in East, South and Southeast Asia Tien Ming Lee, Amanda Sigouin, Miguel Pinedo-Vasquez, Robert Nasi, 2014-11-11 Bushmeat has always provided a source of nutrition and traditional medicine for local people throughout Asia this important resource is becoming increasingly under pressure due to loss of forest and overharvesting because of rising demand from growing human populations and trade legal and illegal For this reason the conservation of forests and sustainable use of wildlife are both imperative for improving rural livelihoods and poverty alleviation A comprehensive literature review yielded 236 papers relevant to this topic with the greatest number of papers discussing Southeast Asia 61% followed by South Asia 22% and East Asia 16% Potential solutions that emerged from the review include the use of measures of harvest to better gauge sustainable offtake levels protected areas and recovery zones improved governance and the implementation of co management partnerships Potential solutions for the traditional medicine trade include urban demand reduction campaigns introduction of synthetic alternatives increased efforts to reduce illegal trade and implementation of certification schemes for wildlife products In all of these cases a myriad of social implications such as the importance and spiritual significance of bushmeat in different cultures the preferences for bushmeat over farmed alternatives and the tradition of wildlife derived medicines must be considered Areas for further research include the study of climate change on bushmeat and food security the traditional medicine supply chain consumer reaction to synthetic alternatives the use of bushmeat particularly for medicinal purposes in urban societies and the negative effects of the growing wildlife trade on local livelihoods
