Stealing Fire Steven Kotler, Jamie Wheal, 2017-02-21 National Bestseller. CNBC and Strategy Business Best Business Book of the Year. It's the biggest revolution you've never heard of and it's hiding in plain sight. Over the past decade, Silicon Valley executives like Eric Schmidt and Elon Musk, Special Operators like the Navy SEALs and the Green Berets, and maverick scientists like Sasha Shulgin and Amy Cuddy have turned everything we thought we knew about high performance upside down. Instead of grit, better habits or 10,000 hours, these trailblazers have found a surprising short cut. They're harnessing rare and controversial states of consciousness to solve critical challenges and outperform the competition. New York Times bestselling author Steven Kotler and high performance expert Jamie Wheal spent four years investigating the leading edges of this revolution, from the home of SEAL Team Six to the Googleplex, the Burning Man festival, Richard Branson's Necker Island, Red Bull's training center, Nike's innovation team and the United Nations Headquarters. And what they learned was stunning. In their own ways, with differing languages, techniques and applications, every one of these groups has been quietly seeking the same thing: the boost in information and inspiration that altered states provide. Today, this revolution is spreading to the mainstream, fueling a trillion-dollar underground economy and forcing us to rethink how we can all lead richer, more productive, more satisfying lives. Driven by four accelerating forces: psychology, neurobiology, technology and pharmacology, we are gaining access to and insights about some of the most contested and misunderstood terrain in history. *Stealing Fire* is a provocative examination of what's actually possible: a guidebook for anyone who wants to radically upgrade their life.

Desert to Dream Barbara Traub, 2011 Offers a photographic record of the annual event held in the Black Rock Desert in Northern Nevada from its beginning as a performance art exhibit to its current status as a pop culture destination.

The Tribes of Burning Man: How an Experimental City in the Desert Is Shaping the New American Counterculture Steven T. Jones, 2011 Burning Man is the premier countercultural event of

modern times growing over 25 years from a strange San Francisco beach party into an experimental city of 50 000 colorful souls in Nevada's Black Rock Desert which burns brightly for a week before dissolving into dusty memories and changed lives. Longtime newspaper journalist Steven T Jones embedded himself in this blossoming culture starting in 2004 a dispiriting year for American politics but the beginning of Burning Man's renaissance when it exploded outward in unexpected ways. The result is the most in depth book ever written on this intriguing social phenomenon *The Tribes of Burning Man: How An Experimental City in the Desert is Shaping the New American Counterculture* which is being released in January 2011 by CCC Publishing. From covering the Borg2 artists rebellion to learning how to make large scale fire sculptures with the Flaming Lotus Girls from helping Opulent Temple showcase the world's best DJs to cleaning up after Hurricane Katrina with Burners Without Borders from regularly interviewing event founder Larry Harvey to covering Barack Obama's nominating convention speech Jones gives readers an inside meticulously reported look at a time when Burning Man hit its zenith just as the country hit its nadir. Hundreds of thousands of people from all over the world have made the dusty pilgrimage to Black Rock City to take part in this experiment in participatory art commerce free culture and bacchanalian celebration and many say their lives were fundamentally changed by this truly unique experience
