**Buses in Leeds** Robert F. Mack,1974    *Roads & Rails of West Yorkshire, 1890-1950* A. E. Jones,1984    Chicago: past, present, future ... Second edition, etc John Stephen WRIGHT,1870    **The Industrial Archaeology and Industrial History of Northern England** ,1985    Computer-Aided Transit Scheduling Joachim R. Daduna,Anthony Wren,2012-12-06 This volume consists of papers presented at the Fourth International Workshop on Computer Aided Scheduling of Public Transport which was held in Hamburg from 28th to 31st July 1987 The first of this series of Workshops was held in Chicago in 1975 Papers presented then tended to look forward to what might be done in the future application of computers to problems in transit scheduling No presentations described systems which had been implemented and were being used on a regular basis although a few papers discussed apparently successful once off applications in both bus scheduling and bus crew scheduling or run cutting However within a few months of the end of that first workshop some systems had been implemented both in Europe and in North America By the time of the second Workshop in Leeds in 1980 several systems were in regular use Most of the crew scheduling implementations were based on heuristic methods e g RUCUS although mathematically based methods were being used in Quebec City and in Hamburg and several papers described further mathematical methods in the course of development A wide variety of bus scheduling approaches was reported many of them being in regular use    *Subject Index of Modern Books Acquired* British Library,1971    The Mediated City Stephen Coleman,Nancy Thumim,Chris Birchall,Julie Firmstone,Giles Moss,Katy Parry,Judith Stamper,Jay G. Blumler,2016-08-15 How does news circulate in a major post industrial city And how in turn are identities and differences formed and mediated through this circulation This seminal work is the first to offer an empirical examination and trace a city's pattern of news circulation Encompassing a comprehensive range of practices involved in producing circulating and consuming news and recognizing the various ways in which individuals and groups may find out follow and discuss local issues and events The Mediated City critiques thinking that takes the centrality of certain news media as an unquestioned starting point By doing so it opens up a discussion do we know what news is What types of media constitute it And why does it matter    Industrial Arts Index ,1922    **Tramway and Railway World** ,1906    *Advances in Human Aspects of Transportation: Part II* Neville Stanton,Steven Landry,Giuseppe Di Bucchianico,Andrea Vallicelli,2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book

brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system
