This text provides a unique collection of case studies across a wide range of organizations: higher education, K-12 education, military, state and local government, administration, non-profit institutions and agency management, etc. These cases examine ethical decision making and organizational and leadership behavioral concepts that are practiced in these organizations. The cases cover topics facing our workforce today and ask the reader to solve the dilemma. Through a discussion of these cases, students apply decision making and organizational and leadership strategies to analyze each case and therefore gain a better understanding of how to effectively lead and manage within their organizations. This text challenges students to think critically and analytically. Students are encouraged to reflect on options a practitioner could use to solve the problem. All of the cases end with an open scenario and a set of questions allowing students to offer a wide range of opinions and participate.
