Business Intelligence Jörg

Greitemeyer, 2002-04-23 Inhaltsangabe Abstract The worldwide process of globalization makes it necessary for a firm to collect in formation about its external environment competitors stakeholders products markets etc and to relate it with the internal information of the firm In 1985 Porter and Millar 1985 described an information revolution that affects competition in different ways Collecting internal and external data is the necessary first step to guarantee a valid information base for strategic decisions and successful actions The evaluation of these data for decision making processes and the ability to see important relations and structures in the data can be supported by new IT applications called Business Intelligence henceforth BI This thesis examines the latest developments of information technologies from the Resource based perspective of Strategic Management The general question that motivates this thesis and needs to be answered is Can the use of Business Intelligence Applications lead to a sustainable competitive advantage One a more concrete level it asks if Business Intelligence solutions can be resources that lead directly to a long lasting competitive advantage or at least to a temporary advantage Answering those questions pursues the aim of making a step towards the operationalization of the Resource based View RBV and the more specialized Dynamic Capability View DCV The subject of the analysis is a specific Business Intelligence software solution which has been chosen because it is representative of all BI applications It is offered worldwide on the markets for analytical applications in Europe Asia and America and based on the common data warehouse technology

This thesis is supposed to provide the base for possible further empirical work regarding this topic. The empirical work of this thesis is done in the mode of a case study concentrating on a set of information technology products. The examination of a specific application that is offered on the market Business Intelligence on an analysis based on the Resource based view enables the proving of statements about BI with the help of concrete examples. The case study is based to substantial parts on information derived from personal interviews with Siemens Business Services Germany and information available in the Internet. The first part of this thesis section 2 gives an introduction and categorization of Business Intelligence.
