The Art and Science of Lesson Design John R. Walkup, 2020-01-11 The Cognitive Rigor Matrix superposes two of the most common tools used in K-12 education: Bloom's Revised Taxonomy and Depth of Knowledge. This matrix has been adopted by numerous state departments of education and national organizations to evaluate the rigor of educational materials. The matrix also offers a powerful ability to help teachers plan and carry out standards-based lessons that best support student learning. This book, aimed at secondary school teachers of all subjects, provides a systematic means of leveraging the Rigor Cube to develop rigorous standards-based lesson plans. The approach employed in this book includes the development of culminating activities for students to demonstrate their learning, identification of standards-based lesson content, selection of potentially effective instructional methods, and student questioning strategies. Special methods for supporting students who are deficient in their background knowledge without undermining the rigor of lessons are also included. Sample lessons are included that illustrate every step of the lesson planning process from start to finish. These sample lesson plans address state content standards related to the Common Core State Standards, both math and English language arts, Next Generation Science Standards, career technical education standards, and art.

Mathematics Methods for Elementary and Middle School Teachers Mary M. Hatfield, 2004-04-29 An activity-based approach to teaching with an emphasis on using manipulatives to build conceptual understanding. This invaluable book combines practical teaching ideas, video examples, updated assessment techniques, and the NCTM Assessment Standards to give teachers all the background they need to introduce elementary and middle school students to
