14 Exemplar Life Science Memorandum:

Age of System Hunter Heyck, 2015-09 In the years after World War II a new generation of scholars redefined the central concepts and practices of social science in America Before the Second World War social scientists struggled to define and defend their disciplines After the war high modern social scientists harnessed new resources in a quest to create a unified understanding of human behavior and to remake the world in the image of their new model man In *Age of System* Hunter Heyck explains why social scientists shaped by encounters with the ongoing organizational revolution and its revolutionary technologies of communication and control embraced a new and extremely influential perspective on science and nature one that conceived of all things in terms of system structure function organization and process He also explores how this emerging unified theory of human behavior implied a troubling similarity between humans and machines with freighted implications for individual liberty and self direction These social scientists trained a generation of decision makers in schools of business and public administration wrote the basic textbooks from which millions learned how the economy society polity culture and even the mind worked and drafted the position papers books and articles that helped set the terms of public discourse in a new era of mass media think tanks and issue networks Drawing on close readings of key texts and a broad survey of more than 1 800 journal articles Heyck follows the dollars and the dreams of a generation of scholars that believed in the system He maps the broad landscape of changes in the social sciences focusing especially intently on the ideas and practices associated with modernization theory rational choice theory and modeling A highly accomplished historian Heyck relays this complicated story with unusual clarity

Cultivating Development

David Mosse, 2004-11-20 What if development agencies and researchers are not driven by policy Suppose that the things that make for good policy policy that legitimises and mobilises political support in reality make it impossible to implement By focusing in detail on the unfolding activities of a development project in western India over more than ten years as it falls under different policy regimes this book takes a close look at the relationship between policy and practice in development David Mosse shows how the actions of development workers are shaped by the exigencies of organisations and the need to maintain relationships rather than by policy but also that development actors work hardest of all to maintain coherent representations of their actions as instances of authorised policy Raising unfamiliar questions Mosse provides a rare self critical reflection on practice while refusing to endorse current post modern dismissal of development
