Consequently, the results of the present study suggest that the use of a single, low-dose, oral, short-acting PDE5 inhibitor may be a safe and effective treatment for patients with mild to moderate hypertension.

They are not the same, however, because the former is a generalization, while the latter is a specific instance of the former.

Other than a few minor differences, the two versions are identical. The primary difference is that the second version includes a few additional lines of code that are not present in the first version. These additional lines of code are used to handle the case where the user enters a character that is not a digit. In this case, the program will display an error message and then prompt the user to enter a valid digit.
