Resources in Education, 1999-04 **Essentials of Research Methods for Educators** Anastasia Kitsantas, Timothy J. Cleary, Maria K. DiBenedetto, Suzanne E. Hiller, 2023-10-13 *Essentials of Research Methods for Educators* provides future teachers, specialists, administrators, and educational leaders with a textbook and a resource that goes beyond the classroom to use in your career. With a focus on the wide variety of data available to educators and the importance of data literacy for all those involved in education, this book presents research methods in a relatable educational context with a variety of concrete examples. The authors use their expertise in educational psychology to optimize learning. The structure of the book breaks down research into discrete steps with the Let's See It, Let's Do It, and You Do It steps for each chapter so students feel motivated to complete their research projects. By covering qualitative, quantitative, and mixed methods research with additional chapters on action research and program evaluation, students get a complete picture of the current research methods landscape. This highly scaffolded book supports future educational leaders in incorporating research and methods into their work and life.

Handbook of Reading Disability Research Anne McGill-Franzen, Richard Allington, 2010-09-17 *Bringing together a wide range of research on reading disabilities, this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective. Emphasizing that learning to read proficiently is a long-term developmental process involving many interventions of various kinds all keyed to individual developmental needs, it addresses traditional questions: What is the nature or causes of reading disabilities? How are reading disabilities assessed? How should reading disabilities be remediated? To what extent is remediation possible but from multiple or alternative perspectives? Taking incursions into the broader research literature represented by linguistic and anthropological paradigms as well as psychological and educational research, the volume is on the front line in exploring the relation of reading disability to learning and language, to poverty and prejudice, and to instruction and schooling. The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities. Throughout their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers.*
