Advanced Introduction to Business Ethics Hooker, John, 2021-08-27 This concise and engaging Advanced Introduction provides the conceptual tools necessary to make ethical decisions in today's business world

John Hooker provides an objective and closely reasoned analysis of ethical issues based on a unified conceptual framework that distills the best of ethical thought into three clearly articulated principles: the generalization, utilitarian, and autonomy principles.

Transformation Literacy Petra Künkel, Kristin Vala Ragnarsdottir, 2022-03-02 This open access book brings science and practice together and inspires a global movement towards co-creating regenerative civilizations that work for 100% of humanity and the Earth as a whole. With its conceptual foundation of the concept of transformation literacy, it enhances the knowledge and capacity of decision makers, change agents, and institutional actors to steward transformations effectively across institutions, societal sectors, and nations. Humanity is at crossroads. Resource depletion and exponential emissions that not only cause climate change but endanger the health of people and planet call for a decisive turnaround of human civilization. A new and transformative paradigm is emerging that advocates for regenerative civilizations in which a narrative of systemic health as much as individual and collective vitality guide the interaction of socio-economic-ecological systems. Truly transformative change must go far beyond technical solutions and instead envision what can be termed a new operating system that helps humankind to live well within the planetary boundaries and partner with life's evolutionary processes. This requires transformations at three different levels: Mindsets that reconnect with a worldview in which human agency acknowledges its co-evolutionary pathways with each other and the Earth; Political, social, and economic systems that are regenerative and foster the care-taking for Earth life support systems; Competencies to design and implement effective large-scale transformative change processes at multiple levels with multiple stakeholders. This book provides key ingredients for enhancing transformation literacy from various perspectives around the globe. It connects the emerging practice of stewarding transformative change across business, government, institutions, and civil society actors with the most promising scientific models and concepts that underpin human action to shape the future collectively in accordance with planetary needs.

Advanced Introduction to the Austrian School of Economics Randal G. Holcombe, 2014-04-25 Elgar Advanced Introductions are stimulating and thoughtful introductions to major fields in the social sciences and law, expertly written by some of the world's leading scholars. Advanced Introduction to Social Innovation Frank Moulaert, Diana MacCallum, 2019 Social innovation (SI) has in the last decade or so become an important idea and concept in policy, practice, and scholarship surrounding human development. It is often seen as an antidote to narrowly defined technological and market-oriented modes of innovation. Its historical significance and development tied to centuries of struggles for social change remain underappreciated and unacknowledged. This Advanced Introduction explores the

historical and contemporary meanings of social innovation and its relationship with political and social movements It develops an understanding of SI as a form of ethical practice for meeting needs transforming social relations and collectively empowering communities to shape the future Additionally it proposes that ethical research should aim to be socially innovative in this sense and provides concrete suggestions of how this concern can be embodied in action research and community development methodologies

Market Engineering Henner Gimpel, Jan Krämer, Dirk Neumann, Jella Pfeiffer, Stefan Seifert, Timm Teubner, Daniel J. Veit, Anke Weidlich, 2021-04-26 This open access book provides a broad range of insights on market engineering and information management It covers topics like auctions stock markets electricity markets the sharing economy information and emotions in markets smart decision making in cities and other systems and methodological approaches to conceptual modeling and taxonomy development Overall this book is a source of inspiration for everybody working on the vision of advancing the science of engineering markets and managing information for contributing to a bright sustainable digital world Markets are powerful and extremely efficient mechanisms for coordinating individuals and organizations behavior in a complex networked economy Thus designing monitoring and regulating markets is an essential task of today's society This task does not only derive from a purely economic point of view Leveraging market forces can also help to tackle pressing social and environmental challenges Moreover markets process generate and reveal information This information is a production factor and a valuable economic asset In an increasingly digital world it is more essential than ever to understand the life cycle of information from its creation and distribution to its use Both markets and the flow of information should not arbitrarily emerge and develop based on individual profit driven actors Instead they should be engineered to serve best the whole society's goals This motivation drives the research fields of market engineering and information management With this book the editors and authors honor Professor Dr Christof Weinhardt for his enormous and ongoing contribution to market engineering and information management research and practice It was presented to him on the occasion of his sixtieth birthday in April 2021 Thank you very much Christof for so many years of cooperation support inspiration and friendship
