**Economic Management And Transition Towards A Market Economy: An Asian Perspective** Anthony Theng Heng Chin, Hock Guan Ng, 1996-10-04 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union. However, a growing demand for policy advice, technical assistance and expertise is also coming from Asian reforming countries such as China, Mongolia, Vietnam, Laos and Cambodia. In addition, business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries. Such developments are too important to overlook or ignore. The transformation of socialist economies towards market based systems entails an unusually wide range of problems. Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents. Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies, all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues. This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia. The contributions are by no means exhaustive. However, they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies.

*East Asian Economic Perspectives*, 1999 **Thailand: Financial Sector Reform and the East Asian Crises** Tull Traisaorat, 2000-02-23 This book takes as its focus the current supervisory and regulatory framework for bank supervision in Thailand and the Thai authorities' efforts to modernise and restructure the Thai banking system. It examines the obstacles to this restructuring which include the current economic difficulties in Thailand and the East Asia region as well as more fundamental historical, cultural and socio-economic factors that underpin Thai society. The book looks at the numerous banking statutes put in place in Thailand in the past sixty years including legislation of the 1980s in response to problems involving fraud, insider dealing and solvency concerns. It examines how historically ambiguous structures of governmental responsibility and power and a heavy emphasis on government discretion in regulation have so far inhibited the effectiveness of this extensive body of legislation in developing a sound modern banking system. There follows an in-depth analysis of the 1997-1998 Thai Banking Crisis and ways in which lessons can be learned to avoid similar crises in the future. The author argues for a greater degree of transparency in the regulatory process to bring it into line with internationally accepted standards for increased supervisory implementation and enforcement by Thai governmental

authorities and for the ultimate depoliticisation of the bank regulatory and supervisory processes Regulating and Combating Money Laundering and Terrorist Financing Nkechikwu Azinge-Egbiri,2021-03-01 This book analytically reviews the impact of the global anti money laundering and counter terrorist financing AML CFT framework on the compliance trajectory of a number of jurisdictions to this framework The work begins by examining the international financial sector reform and its evolution to inculcate the global framework for AML CFT regulations It challenges the resulting uniform AML CFT due to its paradoxical impact on the compliance trajectory of African countries and emerging economies ACs EEs This is done through an examination of the pre conditions for effective regulation and compliance drivers for ACs EEs that reveals the behavioural impact of the AML CFT standards on the bloc of countries Through the application of agency theory it explores the relationship between ACs EEs on the one hand and the international financial institutions that formulate disseminate and facilitate compliance with the global framework for AML CFT standards on the other The remaining chapters review empirically the compliance pressures and resulting compliance trajectory of ACs EEs with the AML CFT standards The final part of the book provides a detailed explanation of the compliance challenges of ACs EEs and the legitimacy concerns that facilitate this This book offers a new direction on the impact of global AML CFT standards on ACs EEs and contributes to the understanding of the conditions under which the global standards are likely to facilitate proactive compliance within these blocs of countries As such it will be a valuable resource for academics researchers and policy makers working in this area
