Modern Metals in Cultural Heritage Virginia Costa, 2019-07-16 This practical guide provides artists conservators curators and other heritage professionals with tools for understanding evaluating and approaching the care and treatment of modern metals The proliferation of new metals such as stainless steels aluminum alloys and metallic coatings in modern and contemporary art and architecture has made the need for professionals who can address their conservation more critical

than ever This volume seeks to bridge the gap between the vast technical literature on metals and the pressing needs of conservators curators and other heritage professionals without a metallurgy background It offers practical information in a simple and direct way enabling curators conservators and artists alike to understand and evaluate the objects under their care This invaluable reference reframes information formerly found only in specialized technical and industrial publications for the context of cultural heritage conservation As the first book to address the properties testing and maintenance issues of the hundreds of metals and alloys available since the beginning of the twentieth century it is destined to become an essential resource for conservators artists fabricators curators collectors and anyone working with modern metals *ASM Study Manual for LTAM*.
