

ASSEMBLING ARGUMENTS

The background of the cover features an abstract geometric design. It includes several overlapping yellow shapes, including a large triangle in the top right and a long, thin triangle extending from the bottom left towards the center. A blue circle is positioned in the lower right quadrant, with a smaller blue circle inside it. Red rectangular bars are placed at the top left, top right, and bottom left corners, and a small red square is at the bottom right corner.

Assembling Arguments Multimodal Scientific Communication:

Assembling Arguments Jonathan Buehl, 2016 A comprehensive account of multimodal scientific persuasion with a framework for analysis and teaching

Assembling Arguments Jonathan Buehl, 2016-01-20 Scientific arguments and indeed arguments in most disciplines depend on visuals and other nontextual elements however most models of argumentation typically neglect these important resources In *Assembling Arguments* Jonathan Buehl offers a concentrated study of scientific argumentation that is sensitive to both the historical and theoretical possibilities of multimodal persuasion as it advances two related claims First rhetorical theory when augmented with methods for reading nonverbal representations can provide the analytical tools needed to understand and appreciate multimodal scientific arguments Second science an inherently multimodal enterprise offers ideal subjects for developing general theories of multimodal rhetoric applicable across fields In developing these claims Buehl offers a comprehensive account of scientific persuasion as a multimodal process and develops a simple but productive framework for analyzing and teaching multimodal argumentation Comprising five case studies the book provides detailed treatments of argumentation in specific technological and historical contexts argumentation before World War I when images circulated by hand and by post argumentation during the mid twentieth century when computers were beginning to bolster scientific inquiry but images remained hand crafted products and argumentation at the turn of the twenty first century an era of digital revolutions and digital fraud Each study examines the rhetorical problems and strategies of specific scientists to investigate key issues regarding visualization and argument 1 establishing new instruments as reliable sources of visual evidence 2 creating novel arguments from reliable visual evidence 3 creating novel arguments with unreliable visual evidence 4 preserving the credibility of visualization practices and 5 creating multimodal artifacts before and in the era of digital circulation Given the growing enterprise of rhetorical studies and the field's contributions to communication practices in all disciplines rhetoricians need a comprehensive rhetoric of science one that accounts for the multimodal arguments that change our relation to reality *Assembling Arguments* argues that such rhetoric should enable the interpretation of visual scientific arguments and improve science writing instruction

The Routledge Handbook of Language and Science David R. Gruber, Lynda C. Olman, 2019-11-28 The Routledge Handbook of Language and Science provides a state of the art volume on the language of scientific processes and communications This book offers comprehensive coverage of socio cultural approaches to science as well as analysing new theoretical developments and incorporating discussions about future directions within the field Featuring original contributions from an international range of renowned scholars as well as academics at the forefront of innovative research this handbook identifies common objects of inquiry across the areas of rhetoric sociolinguistics communication studies science and technology studies and public understanding of science covers the four key themes of power pedagogy public engagement and materiality in relation to the study of scientific language and its development uses qualitative and

quantitative approaches to demonstrate how humanities and social science scholars can go about studying science details the meaning and purpose of socio cultural approaches to science including the impact of new media technologies analyses the history of the field and how it positions itself in relation to other areas of study Ushering the study of language and science toward a more interdisciplinary diverse communal and ecological future The Routledge Handbook of Language and Science is an essential reference for anyone with an interest in this area Science and the Internet Alan Gross,Jonathan

Buehl,2016-12-05 The essays in Science and the Internet address the timely topic of how digital tools are shaping science communication Featuring chapters by leading scholars of the rhetoric of science and technology the volume fills a much needed gap in contemporary rhetoric of science scholarship Overall the essays reveal how digital technologies may both fray the boundaries between experts and non experts and enable more collaborative democratic means of public engagement with science Lisa Ker nen PhD Associate Professor and Director of Graduate Studies Department of Communication University of Colorado Denver

The Routledge Handbook of Argumentation Theory Scott Aikin,John Casey,Katharina Stevens,2025-12-30 The Routledge Handbook of Argumentation Theory offers 43 chapters written specifically for this volume by a team of leading international scholars that survey a wide spectrum of research on the nature purpose and promise of argument and the associated practice of argumentation Each chapter provides a state of the art survey to help readers understand and engage with the field s main ideas and problems The book is split into two parts Part I covers orienting approaches in argumentation studies Part II focuses on the main debates in argumentation theory The Handbook illustrates how different disciplines contribute to argumentation theory integrating contributions from logic epistemology social psychology political science communication rhetoric and other fields This volume thus provides researchers and students with a picture of the diversity and depth to the work in argumentation theory today Throughout it clarifies complex questions and methods in this evolving field of study And references at the end of chapters and a comprehensive index at the back of the book provide readers with central resources for further work in this important area of research **Genre Networks**

Carmen Pérez-Llantada,María-José Luzón,2022-09-30 This innovative book employs genre as a fruitful lens for exploring the complexity of science communication online and the new genre assemblages formed at the interface of multiple genres in digital environments P rez Llantada and Luz n argue for a conceptualization of Science 2 0 that views digital genres in conjunction with other genres accounting for the ways in which diverse Internet users choose different points of entry for accessing information on science of varied depth views and perspectives Taking Swales s conceptualization of forms of genre collectivity as its point of departure the book puts forward this new understanding of multisemiotic genre assemblages in digital science communication considering dimensions of hypertextuality intertextuality and multimodality in the interdependent relations between genres The volume draws on a range of case studies each with a distinct genre assemblage and social agenda exploring such areas as high stakes science open peer review science reproducibility citizen science and

social media networking Offering new directions for future research on genre studies and digital science communication Genre Networks Intersemiotic Relations in Digital Science Communication will be of interest to scholars in these fields as well as those working in multimodality language and communication and languages for academic purposes **Journal of Scientific and Industrial Research** ,2014 **Artificial Intelligence Abstracts** ,1991 *Government Reports Annual Index* ,1993 **Current Index to Journals in Education** ,1979 *Interacting With Audiences* Ann M.

Blakeslee,2000-10-01 This distinctive monograph examines the dynamic rhetorical processes by which scientists shape negotiate and position their work within an interdisciplinary community Author Ann M Blakeslee studies the everyday rhetorical practices of a group of condensed matter theoretical physicists and presents here the first substantial qualitative study of the planning and implementation of discursive practices by a group of scientists This volume also represents one of the first studies to use situated cognition and learning theory to study how knowledge of a domain s discursive practices is acquired by newcomers Unlike previous studies of scientists rhetorical practices which have focused primarily on the finished or published texts Blakeslee s involvement with the physicists as they engaged in the composing processes from jotting down planning notes through publishing a scientific paper suggests an alternative view of audience based on cooperative interaction between authors and their interlocutors From this innovative perspective functional knowledge of audiences comes only by entering into some community of practice in which readers also become self defining interlocutors and even participants in joint projects Blakeslee s research follows the physicists work into communal interactive dynamics looking at their overt attempts to get feedback from members of their audiences what that feedback was and how they responded to it This work addresses and extends a model for audience analysis that consists of two primary operations getting to know and understand one s interlocutors and determining how to reach and influence them In doing so it offers important insights into the dissemination of scientific information and thus will be of great interest to scholars and students in the areas of rhetoric of science and technology composition rhetorical theory and scientific writing **Multimodal**

Teaching and Learning Gunther Kress,Carey Jewitt,Jon Ogborn,Tsatsarelis Charalampos,2001-10-04 Multimodal Teaching and Learning The Rhetorics of the Science Classroom achieves the rare goal of explicating multimodality as both theory and practice This is an importantly concrete analysis derived from extended careful and interdisciplinary observation which challenges our thinking about how meaning and knowledge are shaped by our modes of communication The book appeals to a wide range of scholars and practitioners far beyond the science classroom Professor Ron Scollon Department of Linguistics Georgetown University This book takes a radically different look at communication and in doing so presents a series of challenges to accepted views on language on communication on teaching and above all on learning Drawing on extensive research in science classrooms it presents a view of communication in which language is not necessarily communication image gesture speech writing models spatial and bodily codes The action of students in learning is radically rethought all

participants in communication are seen as active transformers of the meaning resources around them and this approach opens a new window on the processes of learning

Communicating Science Alan G. Gross, Joseph E. Harmon, Michael S. Reidy, 2002-04-11 This book describes the development of the scientific article from its modest beginnings to the global phenomenon that it has become today The authors focus on changes in the style organization and argumentative structure of scientific communication over time This outstanding resource is the definitive study on the rhetoric of science
