## Achievement Network Math:

**Math Education for America?** Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U.S. culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. Breaking new ground in detailing and theorizing the politics of math education, Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments: human capital, education policy debates over traditional and reform pedagogy, the assumed content knowledge deficit of math teachers, and the proliferation of profit driven educational businesses. By establishing the interconnectedness of these interests with the national math education curriculum, he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest. **IRP Reprint Series**, 1966

Ferguson, 2007 For more than a decade, economist Ronald F. Ferguson has investigated the myriad factors that combine to create racial disparities in academic performance, ranging from school policies and practices to informal interactions between children and their parents and peers. Toward Excellence with Equity brings together Ferguson's most important articles and most recent thinking on these ideas. Taken together, these essays show that closing achievement gaps is more urgent today than ever before and that dramatic success is possible. This book issues an urgent call to action to anyone concerned about the lagging success rates among minority children in American schools and the repercussions for our country's future. Ronald Ferguson not only surveys the bleak terrain surrounding the achievement gap but provides all of us with a road map to reach higher ground. Geoffrey Canada, President and CEO, Harlem Children's Zone. Toward Excellence with Equity is an important book written by one of the nation's foremost experts on education and economic development. Ronald Ferguson's pioneering work on black-white disparities in student skill levels and achievement test scores has significant public policy implications. This book is a must read for anyone concerned about narrowing the racial gap in educational attainment and earnings. William Julius Wilson, Lewis P. and Linda L. Geyser University Professor, Harvard University. This book combines high quality research, judicious insights, brilliant speculation, and common sense to set forth strategies to reduce the achievement gap dramatically. It is particularly compelling in calling for a comprehensive social movement that will not only transform schools but establish strong communities, effective parenting, and powerful peer
