2014 Registration At Vaal University

Nico Cloete,Johann Mouton

2014 Registration At Vaal University:

Doctoral Education in South Africa Nico Cloete, Johann Mouton, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation Science and Technology (CREST) as well as on studies from the rest of Africa and the world. In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

Achieving Full Realization and Mitigating the Challenges of the Internet of Things Odhiambo, Marcel Ohanga, Mwashita, Weston, 2022-03-04 As the internet of things market is booming several issues are delaying the full realization of the technology. Currently business competitors are jockeying for a piece of the market meaning solutions from researchers that address these issues is crucial for internet of things technology developers. Overpromising followed by underdelivering has been the current approach by many innovators and the mismatch results in losses in production, orphaned technologies and frequent system failures. Solutions that address internet of things performance issues must be studied in order to take full advantage of this emerging market. *Achieving Full Realization and Mitigating the Challenges of the Internet of Things* addresses the challenges faced in rolling out internet of things technologies as well as the various performance issues. Covering a range of topics such as cybersecurity and connectivity issues this reference work is ideal for industry professionals, academicians, researchers, practitioners, technology developers, instructors and students.
