His books include *The Man Who Mistook His Wife for a Hat*, *Hallucinations* and *Musicophilia*. Sacks' writings have inspired many adaptations which included the Oscar nominated movie *Awakenings*. Dr Sacks was also a skilled pianist who penned about the bond between music and the mind in his book *Musicophilia*. [Oliver Sacks: The Last Interview](#) Oliver Sacks, 2016-11-15 An extraordinary collection of interviews with the beloved doctor and author whose research and books inspired generations of readers. Oliver Sacks called the poet laureate of medicine by the New York Times illuminated the mysteries of the brain for a wide audience in a series of richly acclaimed books including *Awakenings* and *The Man Who Mistook His Wife for a Hat* and numerous New Yorker articles. In this collection of interviews Sacks is at his most candid and disarming, rich with insights about his life and work. Any reader of Sacks will find in this book an entirely new way of looking at a brilliant writer. **Letters** Oliver Sacks, 2024-11-05 The letters of one of the greatest observers of the human species revealing his passion for life and work, friendship and art, medicine and society and the richness of his relationships with friends, family and fellow intellectuals over the decades collected here for the first time. Dr Oliver Sacks who describes himself in these pages as a philosophical physician and a neuropathological Talmudist wrote letters throughout his life to his parents and his beloved Auntie Len to friends and colleagues from London, Oxford, California.

and around the world The letters begin with his arrival in America as a young man eager to establish himself away from the confines of postwar England and carry us through his bumpy early career in medicine and the discovery of his writer's voice his weight lifting motorcycle riding years and his explosive seasons of discovery with the patients who populate his book Awakenings his growing interest in matters of sight and the musical brain his many friendships and exchanges with writers artists and scientists to say nothing of astronauts botanists and mathematicians and his deep gratitude for all these relationships at the end of his life Sensitively introduced and edited by Kate Edgar Sacks's longtime editor the letters deliver a portrait of Sacks as he wrestles with the workings of the brain and mind We see through his eyes the beginnings of modern neuroscience following the thought processes of one of the great intellectuals of our time whose words as evidenced in these pages were unfailingly shaped with generosity and wonder toward other people **Neuroscience and Art** Amy

Ione, 2024-08-27 This book is focused on how understanding ourselves as humans is incomplete without considering both biological and cultural aspects Using the neurocultural perspective the book explores how everything in the world is filtered back and forth through the brain and culture The thrust of the book therefore is to explore the power of art in creating a bridge between cultural and neuroscientific lines of inquiry Looking at both clinical and non clinical populations the text examines historical foundations distinguishes congenital developmental conditions from those that are acquired and emphasizes how the brain constructs our sensory experiences Several distinctive features separate this research from other publications First the book opens with a review of how the historical literature is still etched into the ideas we employ to explain elements across the interdisciplinary fields of art aesthetics our sensory experience psychology cognition and well being Second the research adopts a humanistic rather than a philosophical or social science perspective in demonstrating the value of coupling anatomy and physiology with the natural and social environment In this artists from all genres are incorporated Among them are Iris Murdoch Ludwig van Beethoven Leonardo da Vinci Cristoforo de Predis Rembrandt Federico Fellini Chuck Close and David Hockney Case studies demonstrate how neuroscientific research meshes with art individual and cultural variables in ways that range from health and well being to physiological decline and biological traumas These include a case study that examines how Oliver Sacks combined biology and biography in his writings It also explores art projects in several genres inspired by his studies Another case study is on the role of film as a useful clinical tool Here the book also demonstrates that cinematic devices used by filmmakers intersect with perceptual and cognitive neuroscience A defining feature of the analysis is the integration of research on brain injuries with humanistic responses in film literature and the visual arts This section outlines the lack of consensus regarding the causes and treatment of shell shock in World War I before introducing how research and art now work with PTSD TBI Finally the book examines therapeutic cases of professional and non professional artists concluding with a discussion of synesthesia and the senses

his report Sacks will go far if he does not go too far It is now abundantly clear that Sacks has never stopped going From its opening pages on his youthful obsession with motorcycles and speed *On the Move* is infused with his restless energy As he recounts his experiences as a young neurologist in the early 1960s first in California and then in New York where he discovered a long forgotten illness in the back wards of a chronic hospital as well as with a group of patients who would define his life it becomes clear that Sacks's earnest desire for engagement has occasioned unexpected encounters and travels sending him through bars and alleys over oceans and across continents PRAISE FOR OLIVER SACKS Sacks's empathy and intellectual curiosity his delight in as he calls it joining particulars with generalities and especially narratives with neuroscience have never been more evident than in his beautifully conceived new book remarkably candid and deeply affecting Boston Globe Honest lucid passionate humorous humane and human also slightly Martian a marvelous memoir which is as unconventional and singular as the man himself Wall Street Journal Sacks delving accounts of the invalids he treats have until now stood in stark contrast to his restraint about revealing himself deeply even though autobiographical threads run through such books as *A Leg to Stand On* *Uncle Tungsten* and *Hallucinations* A doctor concerned engaging humane eccentric and unforthcoming has occupied the foreground in his self description With *On the Move* he has finally presented himself as he has presented others as both fully vulnerable and an object of curiosity New York Times
