**Technology, Business and Sustainable Development** S.M. Riad Shams, Demetris Vrontis, Yaakov Weber, Evangelos Tsoukatos, Lea Iaia, 2023-06-30 Triple bottom line TBL or 3BL was coined as a wide and inspiring approach for businesses aimed at understanding how to create, track and manage economic, social and environmental values. The sustainability sector is strongly increasing its relevance among academics and practitioners and the market opportunities associated with the sustainable development goals SDGs are estimated at over 12 trillion per year by 2030. Although this is a promising context, a recent article suggested a rethinking of the TBL, arguing that sustainability goals value should not be assessed in terms of profit and loss but of people well-being and planet health, looking for a societal profit. Technology plays a crucial role in our society. Respectively the Agenda 21 and the Paris Agreement consider technology to be essential in the pursuit of sustainable development and the achievement of the SDGs. Adding to this, the Covid 19 pandemic has accelerated the adoption of digital solutions in several fields from the way of working to the way of buying and consuming. Companies are becoming more aware of the responsibility they have within environmental and human contexts and people are looking for work reflecting their values and purposes to motivate them. This book aims to contribute to the understanding of the role of technology and its emerging and innovative solutions in the achievement of sustainable development while making a profit. It will be of value to researchers, academics, practitioners and students in the fields of strategic management, entrepreneurship, management of technology and innovation and sustainable development.
