in the United States that rainwater harvesting is a viable technology in urban settings. All that is not to take advantage of the resource that the fresh water falling on your roof and draining into the sewer is. By doing this you not only control your water supply and replace at least a substantial portion of your water needs. Rainwater harvesting systems can be configured to supply your whole house and/or your landscape. What Are The Benefits Of Rainwater Collection Rainwater is a relatively clean and absolutely free source of water. You have total control over your water supply and for cities with water restrictions it is ideal and environmentally friendly. It promotes efficiency and helps conserve water. Rainwater is used for lawns and gardens because it is healthy and it reduces the amount of runoff from homes and businesses. It can solve drainage problems outdoors while saving you with fresh water. It is a much healthier alternative that is inexpensive and easy to maintain. It can be used as a main source of water for a backwater source to wells and municipal water. The system can be installed to existing structures built during new home construction. Systems are versatile and non-modular in nature allowing for installation in rural or urban areas. It can provide an excellent backup source of water for emergency situations. Don't forget you don't need more rainwater harvesting devices. Why Install Rainwater Harvesting Immediately
