Hi-fi News ,2005 **Extrusion Processing Technology** Jean-Marie Bouvier,Osvaldo H. Campanella,2014-03-31

Extrusion is the operation of forming and shaping a molten or dough like material by forcing it through a restriction or die. It is applied and used in many batch and continuous processes. However, extrusion processing technology relies more on continuous process operations which use screw extruders to handle many process functions such as the transport and compression of particulate components, melting of polymers, mixing of viscous media, heat processing of polymeric and biopolymeric materials, product texturization and shaping, defibering and chemical impregnation of fibrous materials, reactive extrusion and fractionation of solid liquid systems. Extrusion processing technology is highly complex and in depth descriptions and discussions are required in order to provide a complete understanding and analysis of this area. This book aims to provide readers with these analyses and discussions. **Extrusion Processing Technology: Food and Non Food Biomaterials** provides an overview of extrusion processing technology and its established and emerging industrial applications. Potency of process intensification and sustainable processing is also discussed and illustrated. The book aims to span the gap between the principles of extrusion science and the practical knowledge of operational engineers and technicians. The authors bring their research and industrial experience in extrusion processing technology to provide a comprehensive technical yet readable volume that will appeal to readers from both academic and practical backgrounds. This book is primarily aimed at scientists and engineers engaged in industry research and teaching activities related to the extrusion processing of foods, especially cereals, snacks, textured and fibrated proteins, functional ingredients and instant powders, feeds, especially aquafeeds and petfoods, bioplastics and plastics, biosourced chemicals, paper pulp and biofuels. It will also be of interest to students of food science, food engineering and chemical engineering.
