**Emerging Dynamics of Sustainability in Multinational Enterprises** John R. McIntyre, Silvester Ivanaj, Vera Ivanaj, Rabi N. Kar, 2016-02-26 Economic development that meets the needs of the global population without jeopardizing the capacity of future generations is a worldwide challenge for multinational enterprises MNEs. They are expected to balance their role as global economic actors and environmental stewards in the environment in which they operate. Contributors from India, Europe and the United States offer new perspectives contrasting US, European and emerging economies approaches to sustainability and how they can generate roadmaps which yield innovative solutions for one of the most contentious issues of our era. Their review suggests that the differential performance across developed and emerging economies has exposed potential weaknesses. Emerging Dynamics of Sustainability in Multinational Enterprises promotes greater emphasis on experimenting with unique local and sustainable approaches to solving problems faced by firms in or from emerging economies. This is a critical resource for researchers, practitioners and policy makers concerned with sustainable development issues and a fresh reference for graduate level students and academics focusing on corporate governance, sustainable development and ethics as well as multinational enterprise management.

**Retirement in Japan and South Korea** Masa Higo, Thomas R. Klassen, 2015-04-10 This book analyses reforms to retirement policies in Japan and South Korea especially in the context of rapid population ageing. A defining feature of the labour markets and workplaces in these two nations and the lives of workers and families is involuntary retirement at relatively young ages. The book explains past developments and recent reforms of retirement policies both in the two countries as well as in a cross national comparative manner. At the core of the book is an examination of the social, economic and political conflicts around retirement such as between younger and older workers, between employers and governments and between employers and workers. The policy recommendations offered apply not only to Japan and South Korea but also to other nations such as China. The volume is of value particularly for those interested in labour markets and workplaces, population ageing and contemporary East Asia in addition to those studying retirement and pensions. Policymakers, business leaders, worker organizations, researchers and students will benefit from the insights about the past, present and future of retirement.

**Business Battles in the US Energy Sector** Christian Downie, 2019-01-17 This book is ground breaking in its study of business actors in climate and energy politics. While various studies have demonstrated the influence of business actors across multiple policy domains, this is the first to examine the behaviour of business actors in energy centric industries in the US that will be vital for achieving a clean energy transition, namely the oil, gas, coal, utility and renewable industries. Drawing on almost 80 interviews with senior energy executives, lobbyists and policymakers, it asks two central questions: i) how and why are business actors shaping energy policy contests in the US? And ii) what are the implications for policymakers? In answering these questions, this book provides new insights about the preferences and strategies of business in the energy sector and significantly it identifies strategies for

policymakers seeking to regulate energy in the face of political resistance from incumbent fossil fuel industries This book will be of particular value to students scholars and policymakers working in the fields of energy climate and environmental politics as well as individuals generally interested in the role that business exerts over policy processes *Understanding Popular Culture and World Politics in the Digital Age* Laura J. **China's International Investment Strategy** Julien Chaisse, 2019-02-07 Since China adopted its open door policy in 1978 which altered its development strategy from self-sufficiency to active participation in the world market, its goal has remained unchanged to assist the readjustment of China's economy to coordinate its modernization programs and to improve its quality of life. With the 1997 launch of the Going Global policy, an outward focus regarding foreign investment was added to circumvent trade barriers and improve the competitiveness of Chinese firms. In order to accommodate inward and outward investment, China's participation in the international investment regime has underpinned its efforts to join multilateral investment related legal instruments and conclude international investment agreements. This collection, compiled by award-winning scholar Professor Julien Chaisse, explores the three distinct tracks of China's investment policy and strategy: bilateral agreements including those with the US and the EU; regional agreements including the Free Trade Area of the Asia Pacific and global initiatives spearheaded by China's presidency of the G20 and its Belt and Road initiative. The book's overarching topic is whether these three tracks compete with each other or whether they complement one another, a question of profound importance for the country's political and economic future and world investment governance.
