## **Algebraic Surfaces Classics In Mathematics:**

**Algebraic Surfaces** Oscar Zariski, 2012-12-06 The aim of the present monograph is to give a systematic exposition of the theory of algebraic surfaces emphasizing the interrelations between the various aspects of the theory algebro geometric topological and transcendental To achieve this aim and still remain inside the limits of the allotted space it was necessary to confine the exposition to topics which are absolutely fundamental The present work therefore makes no claim to completeness but it does however cover most of the central points of the theory A presentation of the theory of surfaces to be effective at all must above all give the typical methods of proof used in the theory and their underlying ideas It is especially true of algebraic geometry that in this domain the methods employed are at least as important as the results The author has therefore avoided as much as possible purely formal accounts of results The proofs given are of necessity condensed for reasons of space but no attempt has been made to condense them beyond the point of intelligibility In many instances due to exigencies of simplicity and rigor the proofs given in the text differ to a greater or less extent from the proofs given in the original papers **Algebraic Surfaces** Oscar Zariski, 1995 **Algebraic Surfaces** Oscar 1899-1986 Zariski, 2021-09-09

*Singularity Theory: Dedicated To Jean-paul Brasselet On His 60th Birthday - Proceedings Of The 2005 Marseille Singularity School And Conference* Jean-paul Brasselet, Denis Cheniot, Nicolas Dutertre, Claudio Murolo, Anne Pichon, David Trotman, 2007-02-08 The Singularity School and Conference took place in Luminy Marseille from January 24th to February 25th 2005 More than 180 mathematicians from over 30 countries converged to discuss recent developments in singularity theory The volume contains the elementary and advanced courses conducted by singularities specialists during the conference general lectures on singularity theory and lectures on applications of the theory to various domains The subjects range from geometry and topology of singularities through real and complex singularities to applications of singularities

Lectures on K3 Surfaces Daniel Huybrechts, 2016-09-26 Simple enough for detailed study rich enough to show interesting behavior K3 surfaces illuminate core methods in algebraic geometry *Algebraic Geometry II* I.R. Shafarevich, 1995-12-21 This two part volume contains numerous examples and insights on various topics The authors have taken pains to present the

material rigorously and coherently This book will be immensely useful to mathematicians and graduate students working in algebraic geometry arithmetic algebraic geometry complex analysis and related fields     **Singularity Theory** Denis Chacón, 2007 The Singularity School and Conference took place in Luminy Marseille from January 24th to February 25th 2005 More than 180 mathematicians from over 30 countries converged to discuss recent developments in singularity theory The volume contains the elementary and advanced courses conducted by singularities specialists during the conference general lectures on singularity theory and lectures on applications of the theory to various domains The subjects range from geometry and topology of singularities through real and complex singularities to applications of singularities     **Complex Ball Quotients and Line Arrangements in the Projective Plane (MN-51)** Paula Tretkoff, 2016-02-16 This book introduces the theory of complex surfaces through a comprehensive look at finite covers of the projective plane branched along line arrangements Paula Tretkoff emphasizes those finite covers that are free quotients of the complex two dimensional ball Tretkoff also includes background on the classical Gauss hypergeometric function of one variable and a chapter on the Appell two variable  $F_1$  hypergeometric function The material in this book began as a set of lecture notes taken by Tretkoff of a course given by Friedrich Hirzebruch at ETH Zürich in 1996 The lecture notes were then considerably expanded by Hirzebruch and Tretkoff over a number of years In this book Tretkoff has expanded those notes even further still stressing examples offered by finite covers of line arrangements The book is largely self contained and foundational material is introduced and explained as needed but not treated in full detail References to omitted material are provided for interested readers Aimed at graduate students and researchers this is an accessible account of a highly informative area of complex geometry     **Mathematics of Computation**, 2006     *Interactions of Classical and Numerical Algebraic Geometry* Daniel James Bates, 2009-09-16 This volume contains the proceedings of the conference on Interactions of Classical and Numerical Algebraic Geometry held May 22-24 2008 at the University of Notre Dame in honor of the achievements of Professor Andrew J Sommese While classical algebraic geometry has been studied for hundreds of years numerical algebraic geometry has only recently been developed Due in large part to the work of Andrew Sommese and his collaborators the intersection of these two fields is now ripe for rapid advancement The primary goal of both the conference and this volume is to foster the interaction between researchers interested in classical algebraic geometry and those interested in numerical methods The topics in this book include but are not limited to various new results in complex algebraic geometry a primer on Seshadri constants analyses and presentations of existing and novel numerical homotopy methods for solving polynomial systems a numerical method for computing the dimensions of the cohomology of twists of ideal sheaves and the application of algebraic methods in kinematics and phylogenetics     The Unreal Life of Oscar Zariski Carol Parikh, 1991     **Algebraic Geometry II** I.R.
