Cryptography and Data Security held at the Accra Beach Hotel and Resort Barbados February 23-26 2009 Financial Cryptography and Data Security FC is a well established international forum for research, advanced development, education, exploration and debate regarding information assurance in the context of finance and commerce. The conference covers all aspects of securing transactions and systems. The goal of FC is to bring security and cryptography researchers and practitioners together with economists, bankers and policy makers. This year we assembled a vibrant program featuring 21 peer-reviewed research papers, two panels on the economics of information security and on authentication, and a keynote address by David Dagon. Despite a proliferation of security and cryptography venues, FC continues to receive a large number of high quality submissions. This year we received 91 submissions: 75 full length papers, 15 short papers, and 1 panel. Each submission was reviewed by at least three reviewers. Following a rigorous selection, ranking and discussion process, the Program Committee accepted 20 full length papers, 1 short paper, and 1 panel. The overall acceptance rate was 24%.

Information Privacy Law Daniel J. Solove, Marc Rotenberg, 2003. Now this rapidly evolving area of law finally has the text it deserves. Written by two of the field's leading figures, this new work offers superior clarity, case analysis and organization for the two or three credit course. Its readings and cases cover the full range of privacy issues from Megan's Law to employee monitoring to genetic privacy. It also includes the first extensive coverage of several important topics, especially in such key areas as medical privacy and international law. This new title is succinct, making it easier to teach and more engaging to students. Book jacket
Privacy, Information, and Technology Daniel J. Solove, 2006 **EDN**, 1999 Informational and Decisional Privacy Madeleine Schachter, 2003. Informational and Decisional Privacy explores conceptualizations of privacy rights and interests. Part I covers fundamental principles of privacy law, tracing the historical evolution of privacy rights and reviewing common law and constitutional analytical models. Part II deals with access to information, including through the Internet, considering interests in transparency and self-regulatory, regulatory and legislative regimes, access to various types of information, such as to information pertaining to identity, healthcare, communicative attributes and governmental data and records, and unsolicited access, such as the receipt of subliminal messages and spam e-mail communications. Part III discusses disclosure of information in the context of false statements, publication of accurate but highly embarrassing facts and breaches of confidence. Duties to disclose information in the context of informed consent and in the face of an imminent peril also are reviewed, as are proprietary interests in private information and in somatic matter. Part IV explores autonomous decision making, focusing on reproductive and procreative issues, including regulation of contraceptives and abortion and end-of-life issues, including decisions to refuse life-saving treatment requests for physician-assisted suicide and efforts by proxies to withdraw or withhold life-supporting measures. Informational and Decisional Privacy is designed to be used as a prerequisite or sequel to *Law of Internet Speech*, also by Madeleine Schachter. Separate teacher's manuals accompany both texts.
