

APA (6th edition) Referencing Style

This referencing style sheet is to be used in conjunction with the Library's general Guide to Citing & Referencing. The information is based on the following manual from the American Psychological Association (APA):

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

For help with referencing items not covered in this guide:

You might like to refer to either the *Publication manual of the American Psychological Association* (6th ed.) or the more compact version, *Concise rules of APA style* (6th ed.). Both manuals are available in the Library, on Level 3, at shelf mark 808.06615 AME. You can also access the following ebook via the Library Catalogue: [The complete guide to referencing and avoiding plagiarism](#) – this includes examples for APA and other styles.

Citation

The APA uses an author-date style of referencing with details entered in round brackets, for example:

The traditional approach to human cognition is over-simplified in assuming that processing is typically serial (Eysenck & Keane, 2010).

Treatment of multiple authors: when a work has two authors, cite both authors every time. When a work has three, four or five authors, cite all authors the first time a reference occurs. In subsequent citations, include only the surname of the first author followed by et al. See:

Kisangau, Lyanuu, Hosea, and Joseph (2007) found that ... [first time cited]

Kisangau et al. (2007) found that ... [subsequent citations]

When a work has six or more authors, cite only the surname of the first author followed by et al. and the year of publication for the first and subsequent citations.

Reference list

The reference list should contain full details of all the sources mentioned in your text, arranged alphabetically by surname of first author.

Reference examples

Below are some examples of the more common types of document you might want to reference. Each gives the APA 6th ed. format for the reference, followed by an example. **Treatment of multiple authors within reference list:** when authors number eight or more, include the first six authors' names then insert three ellipses and add the last author's name. (For example:

Kisangau, A., Lyanuu, B., Hosea, C., Joseph, D., Rogers, T., Tyree, C., ..., Humphreys, L. J. (2007). *Psychology*. Birmingham: ABC Press.

Apa 6th Edition 2013 Manual

Alexander Johnson, Hillary Crumlett

Apa 6th Edition 2013 Manual:

Essentials of Assessment Report Writing W. Joel Schneider, Elizabeth O. Lichtenberger, Nancy Mather, Nadeen L. Kaufman, 2018-08-24 The bestselling guide to reporting writing updated and reworked for today's practice *Essentials of Assessment Report Writing* offers effective solutions to the creation of reader friendly yet targeted psychological and educational assessment reports. Parents, clinicians, clients, and other readers need more than test by test descriptions; they need an accessible analysis of the entire situation to determine their next steps. This book provides clear guidance for busy practitioners seeking ways to improve their report writing skills. With a focus on current practice, this new second edition covers DSM 5 updates and the latest assessment instruments, including the WJ IV, WISC V, WAIS IV, KTEA 3, and the CAS2. New discussion includes advice on tailoring the report to the audience and annotated case reports provide illustrative models of effective report styles, interpretation, and analysis. Key concepts are highlighted for quick reference throughout and end-of-chapter questions help reinforce understanding. Reporting styles vary widely within the field; in both content and style, there is no definitive standard, but many reports fail to reflect best practices and therefore prove less than useful to the reader. This book provides expert guidance throughout the reporting process to help practitioners provide high quality, accessible reports. Integrate assessment results to provide a person-centered report. Identify and navigate critical decision points in the interpretive process. Write efficiently yet effectively while enhancing the reader's experience. Provide an accurate, informative, and readable assessment report. Incorporate practical recommendations to address the referral concerns. Expertly conducted assessments should culminate with a carefully constructed analysis that provides direction via clear communication. Because this report will be used to inform treatment intervention and ultimately the client's quality of life, it is critical that it provides clear, informative guidance in a way that readers can understand. *Essentials of Assessment Report Writing* provides comprehensive guidelines for navigating through the report writing process.

Interrogating Motherhood Lynda R. Ross, 2016-12-30 It has been four decades since the publication of Adrienne Rich's *Of Woman Born*, but her analysis of maternity and the archetypal Mother remains a powerful critique as relevant today as it was at the time of writing. It was Rich who first defined the term motherhood as referent to a patriarchal institution that was male defined, male controlled, and oppressive to women. To empower women, Rich proposed the use of the word mothering, a word intended to be female defined. It is between these two ideas that of a patriarchal history and a feminist future that the introductory text *Interrogating Motherhood* begins. Ross explores the topic of mothering from the perspective of Western society and encourages students and readers to identify and critique the historical, social, and political contexts in which mothers are understood. By examining popular culture, employment, public policy, poverty, other mothers, and mental health, *Interrogating Motherhood* describes the fluid and shifting nature of the practice of mothering and the complex realities that define contemporary women's lives.
