

APA Quick Citation Guide

This guide contains examples of common citation formats in APA (American Psychological Association) Style **7th edition**

Using In-text Citation

Include an in-text citation when you refer to, summarize, paraphrase, or quote from another source. For every in-text citation in your paper, there must be a corresponding entry in your reference list.

APA in-text citation style uses the author's last name and the year of publication, for example: (Field, 2005). For direct quotations, include the page number as well, for example: (Field, 2005, p. 14). **For sources such as websites and e-books that have no page numbers**, use a paragraph number, for example: (Field, 2005, para. 1). More information on [direct quotation of sources without pagination](#) is given on the APA Style and Grammar Guidelines web page.

Example paragraph with in-text citation

A few researchers in the linguistics field have developed training programs designed to improve native speakers' ability to understand accented speech (Derwing et al., 2002; Thomas, 2004). Their training techniques are based on the research described above indicating that comprehension improves with exposure to non-native speech. Derwing et al. (2002) conducted their training with students preparing to be social workers, but note that other professionals who work with non-native speakers could benefit from a similar program.

Citing Web Pages in Text

Cite web pages in text as you would any other source, using the author and date if known. Keep in mind that the author may be an organization rather than a person.

For sources with no author, use the title in place of an author.

For sources with no date, use **n.d.** (for no date) in place of the year: (Smith, n.d.).
