Aphasia Therapy Historical And Contemporary Issues Hardcover:

Aphasia Therapy David Howard, Frances M. Hatfield, 2018-09-03 Originally published in 1987 Aphasia Therapy surveys the approaches to aphasia treatment from throughout the world that have been taken both in the past and in the present day. The authors critically examine the assumptions underlying different approaches and show their effects on modern clinical practices. Finally the book offers new perspectives on some contemporary issues in aphasia therapy the effectiveness of treatment and the relationship between an analysis of a patient's problems and the processes of treatment. Aphasia Therapy is divided into three parts Part 1 illustrates some approaches to treatment in the period up to World War II for instance a didactic approach which emphasised the importance of repetition the second part considers the different kinds of approaches to therapy that have developed since then seven schools of treatment are identified Part 3 considers whether there is evidence that treatment of aphasia is effective the authors argue that in future aphasia treatment must involve the development and evaluation of specific treatment methods that are theoretically motivated by a coherent analysis of the individual patient's problems. Students postgraduates and practising clinicians in speech therapy will find this volume of great interest as will neuropsychologists and clinical psychologists

Advanced Age Geriatric Care Nages Nagaratnam,Kujan

Nagaratnam,Gary Cheuk,2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4 3 million to 9 6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older persons are healthier today than their counterparts decades ago

More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management
