Establish the video connections automatically from the camera, encoder, decoder, or Bosch's comprehensive video management system. It can drive an HD monitor via HDMI directly, thus is ideally suited for applications like flat-screen monitor walls. Alternatively, it can connect to an analogue monitor using its composite video BNC output.

VIDEOJET decoder 3000 provides one-channel bidirectional audio communication in parallel to video. Ultra-compact in size, VIDEOJET decoder 3000 is perfect for any application that depends on space-saving solutions.

## Functions

### Access security

VIDEOJET decoder 3000 offers various security levels for accessing the network, the unit, and the data channels. As well as password protection with two levels, it supports 802.1x authentication using a RADIUS server for identification. You can secure Web

browser access by HTTPS using a SSL certificate that is stored in the unit, providing total data protection with AES or 3DES encryption, according to the client's encryption capabilities. Alternatively, each communication channel—video, audio, or serial I/O—can be independently AES encrypted with 128-bit keys, once the encryption site license has been applied.

### High performance

Transmit IP video to a high-performance VIDEOJET decoder 3000 and present it with ultimate clarity on an analog CCTV monitor or on a large, flat-screen display.

VIDEOJET decoder 3000 can handle up to four SD-H, 360 video streams with full resolution and frame rate and display them in quad-view. When in single-view, it can display an HD video stream up to 1080p30 or 720p60.

### Flexibility

With its connection page in the web browser, the optional IP Matrix license, the support of IntelliKey keyboard and integration into Video Clients and Video Management Systems, VIDEOJET decoder 3000 enables solutions in varieties from the smallest stand-alone up to large or distributed but centrally controlled applications.
