**Space 2.0** Joseph N. Pelton, 2019-04-26 A true revolution has rocked the space industry as Silicon Valley and new startup companies around the world have shaken up the status quo. This has in turn triggered a hefty response among traditional aerospace companies launching the sector into the new Space 2.0. This book explains how and why this remarkable change has happened starting from the industry's origins during the Space Age and working its way to the present day. No other industry in the world has experienced the dramatic shift in technology and services as rapidly as the field of satellite services and rocket launch systems has. This book analyzes the dynamic shift over the past decade in how satellites are designed, manufactured, launched, and operated. It also turns an eye to the future, discussing the amazing feats and potential issues we can expect from this shifting arena by 2030. With its beginner-friendly writing style and plethora of illustrations, this book serves as a perfect introductory text to students and professionals alike wishing to learn more about the key trends in the field of space applications and launch systems.

**Fallout** John Solomon, Seamus Bruner, 2020-07-14 This book is a MUST BUY. President Donald J. Trump, The Russia and Ukraine scandals are unraveled. Corruption and greed exposed. No one is better at uncovering the truth than these two investigative journalists. Gregg Jarrett, FOX News legal analyst, and author of the 1 NYT bestsellers The Russia Hoax and Witch Hunt. An exhaustively researched book that reads like an investigative thriller. Fallout reveals how Obama's Russian Reset led to corruption scandal and a desperate bid to impeach Donald Trump. In 2015 a major story broke exposing Hillary Clinton's role in approving the sale of American uranium assets to the Russian state nuclear agency Rosatom. Not only did the sale of Uranium One put 20 percent of America's domestic uranium supply under the control of Vladimir Putin, there was also evidence that the Clintons themselves had hugely profited from the deal. When presidential candidate Donald Trump made Uranium One the centerpiece of his Crooked Hillary attacks, the Clinton team feared its potential to damage Hillary's campaign. Others in the Obama Biden camp worried that if elected, Trump would expose their role in selling out America's security to Putin. Their desperate need to neutralize the issue led them to launch an unprecedented investigation into the Trump campaign's purported ties to Russia. The infamous Steele dossier produced by Clinton-connected Fusion GPS sparked an investigation under FBI Director James Comey. Instead of

ending after the election the investigation grew bigger eventually leading to Comey's firing and the appointment of Special Counsel Robert Mueller. When Mueller failed to find grounds for impeachment, Democrats seized on an ambiguous phone call with the Ukrainian president as a pretext to remove Trump from office. This gambit blew up in their faces when it exposed the secrets that Democrats tried hard to keep buried. An indispensable guide to the hidden background of recent events, *Fallout*, shows how Putin's bid for nuclear dominance produced a series of political scandals that ultimately posed one of the greatest threats to our democracy in modern American history. [Email and the Everyday](#) Esther Milne, 2021-02-09. An exploration of how email is experienced, understood and materially structured as a practice spanning our everyday domestic and work lives. Despite its many obituaries, email is not dead. As a global mode of business and personal communication, email outstrips newer technologies of online interaction. It is deeply embedded in our everyday lives. And yet, perhaps because the ubiquity of email has obscured its study, this is the first scholarly book devoted to email as a key historical, social and commercial site of digital communication in our everyday lives. In [Email and the Everyday](#), Esther Milne examines how email is experienced, understood and materially structured as a practice spanning the domestic and institutional spaces of daily life.
