

Installation and Initial Start-Up

To obtain warranty coverage, please fill out and return the warranty registration card now.

Inspection

Inspect the UPS upon receipt. Notify the carrier and dealer if there is damage. The packaging is recyclable; save it for reuse or disposal at a proper facility.

Placement

Install the UPS in a protected area that is free of excessive dust and has adequate air flow. Do not operate the UPS where the temperature and humidity is outside the specified limits.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the warranty.

Connect to Utility

Operating Instructions

Switch "On" or Switch "Off"

- 1 With the UPS plugged in, press and release the On/Off Test button to supply power to the loads.

The UPS loads are immediately powered while the UPS performs a self-test. Press and release the button again to turn "Off" power to the loads. It may be convenient to use the UPS as a master "On/Off" switch for the protected equipment.

- The on-line LED illuminates when the UPS is supplying utility power to the battery-backed loads.

Self-test

The UPS performs a self-test automatically when turned "On," and every two weeks thereafter (by default). Automatic self-test eliminates the need for periodic manual self-tests.

During the self-test, the UPS briefly operates the loads on-battery. If the UPS passes the self-test, it returns to on-line operation.

- If the UPS fails the self-test it immediately returns to on-line operation and lights the replace battery LED.

- **Check the Line-Wiring Fault Indicator**
Location: Top right corner of UPS back panel.
Caution: If the line wiring fault indicator lights, and a qualified technician to correct the building wiring.

Connect the Loads

Plug the loads into the output connectors on the rear of the UPS. To use the UPS as a master "On/Off" switch, make sure that all of the loads are switched "On."

Caution: Do not connect a laser printer to the Battery Backup Outputs.

Battery Backup Outputs: These UPS outputs provide battery power and surge protection to equipment when utility voltage is outside acceptable limits. Data sensitive equipment such as a computer, monitor, or external drive are connected to these outputs.

The loads are not affected by a failed test. Recharge the battery overnight and perform the self-test again. If the replaced battery LED is still "On," replace the battery using the **Replacing the Battery** procedure.

On-Battery

During on-battery operation, the on-battery LED illuminates and the UPS sounds an audible alarm consisting of 4 beeps every 30 seconds. The alarm stops when the UPS returns to on-line operation.

Low Battery

When the UPS is operating on-battery and the energy reserve of the battery runs low, the UPS beeps continuously until the UPS returns clean from battery depletion or returns to on-line operation.

Overload

When loads exceed the UPS's capacity, the overload LED illuminates and the UPS emits a sustained tone. The alarm ceases "On" and the overload is removed. Disconnect nonessential load equipment from the battery backup outputs, to eliminate the overload.

If the overload is severe, the main circuit breaker may trip (the resettable main plunger at the main breaker pops out), or melt. Disconnect nonessential load equipment from the UPS to eliminate the overload and press the plunger back in to reset the UPS.

If there is AC power and the circuit breaker does not trip during overload, the loads are still powered. If the circuit breaker trips on the UPS attempts to transfer to battery, the loads' power will be shut "Off." Turn the UPS "Off" then back "On" to re-power the loads.

- **Connect Telephone / Network Surge Suppressor (Optional)**

Connect a single line telephone or a 10Base-T/100Base-Tx network cable into the RJ45/RJ11 telephone/network surge protection "IN" jack on the back of the UPS. Connect from the "OUT" jack with telephone cable (supplied) or network cabling that connects to a fax machine or network port.

- **Connect Computer Interface Port (Optional, \$99.00)**

PowerChute[®] plus power management software is included with this UPS. Connect the supplied interface cable to the 8-pin computer interface port on the back panel of this UPS. Connect to the computer. See software documentation for installation instructions.

- **Charge the Battery**

The UPS charges its battery whenever it is connected to utility power. The battery will charge fully during the first 4 hours of normal operation. Do not expect full runtime during this initial charge period.

Replace Battery

- If the battery fails a self-test, the UPS emits short beeps for one minute and the replace battery LED illuminates.

The UPS signals the alarm every two hours. Perform the self-test procedure to confirm replace battery conditions. The alarm stops when the battery passes the self-test.

Shutdown Mode

If there is no power, the load connected to the computer interface port can continued the UPS to shut down. This is normally done to preserve battery capacity after a controlled shutdown of the protected system. In shutdown mode the UPS stops supplying power to the load. The on-line and overload LED indicators flash alternately or, if the UPS has shutdown due to a low battery, the UPS will beep once every 4 seconds for approximately 10 seconds. When line power is restored, the UPS will return to on-line operation.

Cold Start

Note: Cold start is not a normal operating condition.

When the UPS is "Off" and there is no utility power, it is possible to cold start the UPS to power the loads from the UPS's battery.

- **Press and hold the On/Off Test button** until the UPS begins beeping.
- **Release the On/Off Test button** during the beeping to start the UPS.

Storage

Storage conditions

Store the UPS covered and upright in a cool, dry location, with its battery fully charged. Before storing, charge the UPS for at least 4 hours.

Extended storage

At -15 to +30 °C (+5 to +86 °F), charge the UPS's battery every 6 months.
At +30 to +45 °C (+86 to +113 °F), charge the UPS's battery every 3 months.
