perspective on the techniques of coping with the challenges of transitioning from student life to a professional corporate environment. It presents an integrated approach and a workable plan for students to pursue and add value to their careers by developing life and business skills that could be seamlessly woven into a well rounded personality. This book has been designed to help students stand out in terms of knowledge, skills, and attitude. It delineates the transition needs from classrooms to workplace with clearly defined end results imparting skills required to excel individually and as part of a team as a matter of regular practice while working in the corporate world. The primary aim of this book is not just to place graduates in the corporate world but also to enhance their employability skills to make them globally employable in diverse disciplines. Replete with easy to use tips and tools with real world applications, this book will be of immense value to final year graduates and post graduate students as well as placement officers of higher education institutions looking to achieve a good placement record.

APICS Certification Program, 1987 *Manufacturing Planning and Control Systems* Thomas E. Vollmann, William L. Berry, D. Clay Whybark, 1988. Central themes are master planning, material requirements planning, inventory management, capacity management, production activity control, and just in time. Each has been updated for this edition, previous editions 1984 and 1988, to reflect new ideas and practices as the manufacturing world moves toward the zero everything, zero inventory, lead time, defects, waste vision of the future.
