- This survival is dependent on:
  - The organization's ability to external industry factors and
  - Its skillfulness in managing the internal organization of the firm.
- Without the creation of a well-thought-out set of strategies, companies will never survive.

"The current domain and pattern of resource commitments to transformation processes and planned improvements as a means to achieve the distinctive competence and goals of the firm."
  - Important components of an organization's strategy:
    - Development of time horizons.
    - Identification and evaluation of key events.
    - Development of a plan to create, hasten, or compound a distinctive competence.
    - Creation of a competitive advantage.
    - Flexibility of decision patterns.
    - Transformation of inputs into value-added outputs.
