D7024 Fire Alarm Control Panels

- Four detector zones (expandable to eight); up to 20 two-wire smoke detectors per zone
- Built-in DACT
- Two notification appliance circuits (NACs) on board with an internal 24 VPWR, 4 A NAC power supply
- Easily converts to addressable with the addition of a D7039 Multiplex Expansion Module
- Programmable through front panel interface, remote D7033 Liquid-crystal Display (LCD) Keypads, or remote programming software (RPS)

The D7024 Fire Alarm Control Panels (FACPs) can be used in commercial and public building applications such as schools, universities, manufacturing plants, and health care facilities. They are listed by UL for central station, local, auxiliary, and remote station systems.

The D7024 FACPs support four on-board initiating zones that can be expanded to eight using the D7034. Each initiating zone supports two-wire and four-wire detectors configurable as Class A, Style D (with D7014) or Class B, Style B loops. Each zone can support up to 20 two-wire detectors, or any number of four-wire detectors depending on available power. Each FACP has a built-in digital fire alarm communicator transmitter (DACT).

Enhance the D7024 conventional system features when running version 2.02 or higher firmware by adding a D7039 Multiplex Expansion Module. Adding a D7039 Multiplex Expansion Module to the D7024 turns the conventional FACP into an addressable FACP. The D7039 adds up to 247 addressable points to the base system and adds an additional 400 events to the history buffer for a total of 499 events. The D7039 also increases the number of programmable relay outputs from 18 to 58 and allows up to 100 system users (an addition of 84 PINs to the base system).

Functions

Notification Appliance Circuits (NACs)

Two on-board Class B, Style Y or Class A, Style Z (with D7015) NACs provide up to 4 A of 24 VPWR power to operate horns, strobes, bells, and other notification appliances. Each NAC can be programmed to provide Temporal Code 3, steady, pulsed, and synchronized output for Wheelock™ and Gentex™ notification appliances.

User Interface

A viewing port in the keyed control panel enclosure door shows the system status light-emitting diodes (LEDs) and LCD display while maintaining system keypad security. Unlocking the enclosure door provides access to the system controls for silencing off-normal conditions, zone bypassing, detector resetting, testing, other fire functions, and programming. These functions are also available on all D7033 LCD Keypads connected to the system. All D7038 LCD Annunciators provide custom-text annunciation on a 32-character, backlit, two-line LCD display. All system keypads and annunciators have built-in sounders. Back-light intensity and sounder volume are programmable.
