**50 Fantastic Ideas Inspired by Famous Artists** Judith Harries, 2019-07-11 \_\_\_\_\_ The 50 Fantastic Ideas series is packed full of fun original skills based activities for Early Years practitioners to use with children aged 0-5. Each activity features step by step guidance, a list of resources and a detailed explanation of the skills children will learn. Creative, simple and highly effective, this series is a must have for every Early Years setting. 50 Fantastic Ideas Inspired by Famous Artists uses well known art as a visual inspiration to develop expressive art and design skills in the Early Years. It is much easier now to access art online and to bring inspirational pieces into a setting without having to buy postcards or visit an art gallery. Drawing on these readily available online sources, Judith Harries presents 50 ideas featuring a range of diverse artists from Lubaina Himid and Friedensreich Hundertwasser to Mary Delany and Picasso, and famous art including pop and street art, sculpture and portraiture. Using art supplies easily found in and outside the classroom such as paints, clay, pipe cleaners and natural resources like leaves and flowers, the interactive activities found in this book are ideal for inspiring creativity and fun at the same time.

**Food and Landscape: Proceedings of the 2017 Oxford Symposium on Food and Cookery** Mark McWilliams, 2018-07-01 The proceedings of the 2017 Oxford Symposium on Food and Cookery includes 43 essays by international scholars. The topics included agro-ecology, food sovereignty and economic democracy in the agricultural landscape, argued by Colin Tudge, James Rebanks on family life as a hill farmer in the Lake District, and many talks that illustrate Catalan historian Josep Pla's axiom that 'Cuisine is the landscape in a saucepan'. *Development and Sustainability* Alberto Cima, Maurice Mittelmark, Gro Theres Lie, Fungisai P. Gwanzura, Ottemöller, 2016-03-15 While the need for effective action toward a greener and socially inclusive economy has long been evident, health promotion in the context of sustainable development has faltered. Arguing that human health is the key factor to sustainable development, *Development and Sustainability* promotes a fresh transdisciplinary approach to the eradication of extreme poverty. This ground breaking book calls for new forms of cooperation which cross the traditional boundaries between social activism and science and which are capable of harnessing the complex knowledge that such radical change requires. The contributions bridge the gap between those working for health and those working for sustainability, science and the green economy through developing the methodological and scientific means to deal with some of the most critical issues faced by humanity in the twenty first century.

**A Water Story** Geoff Beeson, 2020-02-03 Freshwater scarcity is a critical challenge with social, economic, political and environmental consequences. It describes the nature and distribution of the country's natural water resources, management of these resources by Indigenous Australians, the development of urban water supply and support for pastoral
