Specifications for an Operational Two-tiered Classification System for the Army Joseph Zeidner,2000 The broad objective of the present study is to design an improved two tiered classification system and to compare its classification efficiency to the current operational aptitude area AA system The total data set includes about 260 000 recruits serving in 170 different entry level MOS during 1987 1989 The set includes all available ASVAB Skill Qualification Test SQT data for MOS with adequate sample sizes collected by ARI during this time frame The proposed system to be evaluated in this study would use an invisible or black box first tier in which separate assignment variables AVs are computed for up to 150 job families The first tier AVs are to be used in assigning recruits to entry level MOS The second tier is used in recruiting counseling and administration The proposed system to be evaluated in the visible second tier uses up to 17 families It is proposed that the aptitude area scores of the visible system be recorded on each soldier s personnel record The principal finding of the present study is that the unbiased overall mean predicted performance MPP of the 150 job family structure is 195 compared to the MPP for the existing operational system of 023 a gain of more than eight fold The unbiased overall MPP for the 17 job families is 146 The 17 family system is obtained by shredding the existing AA families within the boundaries of the operational classification families to maximize the Horst index Findings continue to support an early differential assignment theory DAT principle that maximum MPP is obtainable by using AVs for all jobs having adequate or stable validity data The results clearly demonstrate that considerable classification efficiency is potentially obtainable from the existing ASVAB if it is used in accordance with DAT principles DTIC      *The 2002 Guide to the Evaluation of Educational Experiences in the Armed Services* American Council on Education,American Council on Education Staff,2005 Long considered to be the standard reference work in this area this three volume set describes more than 8 000 courses offered between January 1990 and the present by various service branches and the Department of Defense Long considered to be the standard reference work in this area this three volume set describes more than 8 000 courses offered between January 1990 and the present by various service branches and the Department of Defense      **Guide to the Evaluation of Educational Experiences in the Armed Services** ,1994      *Moody's Manual of Investments: American and Foreign* ,1923      Improved Surfacing Materials for Tracked Vehicular Traffic Ralph D.
