Metanoia Adam Ellwanger, 2020-02-25 Western culture is in a moment when wholly new kinds of personal transformations are possible but authentic transformation requires both personal testimony and public recognition In this book Adam Ellwanger takes a distinctly rhetorical approach to analyzing how the personal and the public relate to an

individual's transformation and develops a new vocabulary that enables a critical assessment of the concept of authenticity. The concept of metanoia is central to this project. Charting the history of metanoia from its original use in the classical tradition to its adoption by early Christians as a term for religious conversion, Ellwanger shows that metanoia involves a change within a person that results in a truer version of him or herself, a change in character or ethos. He then applies this theory to our contemporary moment, finding that metanoia provides unique insight into modern forms of self-transformation. Drawing on ancient and medieval sources including Thucydides, Plato, Paul the Apostle, and Augustine, as well as contemporary discourses of self-transformation such as the public testimonies of Caitlyn Jenner and Rachel Dolezal, Ellwanger elucidates the role of language in signifying and authenticating identity. Timely and original, Ellwanger's study formulates a transhistorical theory of personal transformation that will be of interest to scholars working in social theory, philosophy, rhetoric, and the history of Christianity.

The Liberal Media Industrial Complex Mark Dice, 2019-11-12. The media used to mean television, radio, newspapers, and magazines, but today it largely involves social media, which has swallowed up all of these other forms and is now controlled by a small group of Silicon Valley titans who decide what billions of people are able to see and hear online. The convergence of old technology and new has centralized unimaginable power into the hands of a few gigantic corporations that now dictate how we communicate with each other and perceive the outside world. Media analyst Mark Dice details how the rise of social media, that tipped the balance of power regarding the production and distribution of information, has also resulted in a massive backlash from those conspiring to regain the influence they once held. Now conservatives are experiencing widespread censorship as the tech giants scramble to put the genie back in the bottle. The liberal media has launched an information war against President Trump and his supporters and are using their monopolies to manipulate public opinion in order to further their aims of a socialist revolution.
