## ABSTRACT

In order to restore distorted images, the unknown blurs have to be identified from the blurred images themselves. We formulate the blur identification problem as a constrained maximum likelihood problem. The constraints directly incorporate a priori known relations between the blur (or image model) coefficients, such as symmetry properties, into the identification procedure. The resulting nonlinear minimization problem is solved iteratively, yielding a very general identification algorithm. An example of blur identification on synthetic data is given.

## 1. INTRODUCTION

The first step towards the restoration of degraded images is the identification of the kind of degradation the image has suffered. Modeling a blurred image as the output of a 2-dimensional linear system, the identification problem is the problem of estimating the unknown characteristic point-spread function (PSF) of this system. One approach to blur identification is to obtain a model of the blurring system from the physical nature of the problem. Unfortunately, one has hardly ever enough a priori knowledge to determine the PSF in this way. Therefore, the information about the blurring processes has to be determined from the blurred image itself.

The earliest work on blur identification concentrated on identifying PSFs that have zeros only on the unit bi-circle [1]. One of the shortcomings of this method is that rays which do not satisfy this requirement, such as a properly truncated Gaussian PSF, cannot be identified. In more recent work [2,3] the original image is first modeled as a 2-D autoregressive (AR) process. Then, if the observed blurred image is assumed noiseless, the image and blur model identification problem is specified as a 2-D autoregressive moving-average (ARMA) identification problem, where the AR coefficients are related only to the image model, and the MA coefficients only to the blur model (PSF).

Tekalp et al. [2] derived maximum likelihood estimates for these ARMA parameters, and computed them by first decomposing the PSF into four (quarter-)quadrantwise convolutional factors, each of

\*A.H. Katerman was partially supported by the National Science Foundation under grant number MIP-8614237.

which is stable in the direction of restoration, and next identifying each of these factors respectively. This approach assumes that the unknown PSF is real, symmetric (i.e., zero phase) and has a positive Fourier transform. Biemond et al. [3] showed that the 2-D ARMA identification can be done in parallel, where each of the parallel channels requires the identification of a 1-D complex ARMA process. An intermediate high-order AR approximation step is used to compute these ARMA coefficients.

In this paper we formulate the blur identification problem as a constrained maximum likelihood (ML) problem. The linear constraints incorporated in the formulation represent a general relation between the blur (or image model) coefficients. The resulting nonlinear minimization problem is solved by employing an iterative gradient-based minimization procedure. It is conceptually advantageous to use iterative methods, since they offer the possibility of incorporating a priori knowledge about the original blur and image model into the identification procedure. Furthermore, since they lift upon one complete image are free from the causality restrictions imposed by recursive techniques.

In Section II we describe the mathematical probabilistic models for the image and degradation. Next, in Section III, we formulate the blur identification problem as a ML problem. In this section we also describe the iterative algorithm for minimizing the resulting ML index. Some preliminary experimental results are presented in Section IV. Finally, Section V contains relevant conclusions and discusses areas of further research.

## 2. IMAGE AND DEGRADATION MODELS

## Basic Model Development

It is assumed that the original image  $I(x,y)$  (of the size  $M \times N$  pixels) can be represented by the output of a 2-D AR system

$$f(x,y) = \sum_{(i,j) \in \Omega} a(i,j)I(x-i,y-j), \quad (1)$$

where  $a(i,j)$  are the image model coefficients, and  $\Omega$  the support of the image model, which is not necessarily causal.

By lexicographically ordering of the image data [4] we can use the more compact matrix-vector notation

$$\mathbf{f} = \mathbf{A}\mathbf{I} + \mathbf{v}, \quad (2)$$

## **Iterative Identification And Restoration Of Images:**

**Iterative Identification and Restoration of Images** Reginald L. Lagendijk, Jan Biemond, 2011-09-15 One of the most intriguing questions in image processing is the problem of recovering the desired or perfect image from a degraded version. In many instances one has the feeling that the degradations in the image are such that relevant information is close to being recognizable if only the image could be sharpened just a little. This monograph discusses the two essential steps by which this can be achieved namely the topics of image identification and restoration. More specifically the goal of image identification is to estimate the properties of the imperfect imaging system blur from the observed degraded image together with some statistical characteristics of the noise and the original uncorrupted image. On the basis of these properties the image restoration process computes an estimate of the original image. Although there are many textbooks addressing the image identification and restoration problem in a general image processing setting there are hardly any texts which give an in-depth treatment of the state of the art in this field. This monograph discusses iterative procedures for identifying and restoring images which have been degraded by a linear spatially invariant blur and additive white observation noise. As opposed to non-iterative methods iterative schemes are able to solve the image restoration problem when formulated as a constrained and spatially variant optimization problem. In this way restoration results can be obtained which outperform the best results of conventional restoration filters.

**The Essential Guide to Image Processing** Alan C. Bovik, 2009-07-08 A complete introduction to the basic and intermediate concepts of image processing from the leading people in the field. Up to date content including statistical modeling of natural anisotropic diffusion image quality and the latest developments in JPEG 2000. This comprehensive and state of the art approach to image processing gives engineers and students a thorough introduction and includes full coverage of key applications image watermarking, fingerprint recognition, face recognition and iris recognition and medical imaging. This book combines basic image processing techniques with some of the most advanced procedures. Introductory chapters dedicated to general principles are presented alongside detailed application orientated ones. As a result it is suitably adapted for different classes of readers ranging from Master to PhD students and beyond. Prof Jean Philippe Thiran EPFL Lausanne Switzerland. Al Bovik's compendium proceeds systematically from fundamentals to today's research frontiers. Professor Bovik himself a highly respected leader in the field has invited an all star team of contributors. Students, researchers and practitioners of image processing alike should benefit from the Essential Guide. Prof Bernd Girod Stanford University USA. This book is informative, easy to read with plenty of examples and allows great flexibility in tailoring a course on image processing or analysis. Prof Pamela Cosman University of California San Diego USA. A complete and modern introduction to the basic and intermediate concepts of image processing edited and written by the leading people in the field. An essential reference for all types of engineers working on image processing applications. Up to date content including

statistical modelling of natural anisotropic diffusion image quality and the latest developments in JPEG 2000 **Handbook of Image and Video Processing** Alan C. Bovik, 2010-07-21 55% new material in the latest edition of this must have for students and practitioners of image video processing This Handbook is intended to serve as the basic reference point on image and video processing in the field in the research laboratory and in the classroom Each chapter has been written by carefully selected distinguished experts specializing in that topic and carefully reviewed by the Editor Al Bovik ensuring that the greatest depth of understanding be communicated to the reader Coverage includes introductory intermediate and advanced topics and as such this book serves equally well as classroom textbook as reference resource Provides practicing engineers and students with a highly accessible resource for learning and using image video processing theory and algorithms Includes a new chapter on image processing education which should prove invaluable for those developing or modifying their curricula Covers the various image and video processing standards that exist and are emerging driving today's explosive industry Offers an understanding of what images are how they are modeled and gives an introduction to how they are perceived Introduces the necessary practical background to allow engineering students to acquire and process their own digital image or video data Culminates with a diverse set of applications chapters covered in sufficient depth to serve as extensible models to the reader's own potential applications About the Editor Al Bovik is the Cullen Trust for Higher Education Endowed Professor at The University of Texas at Austin where he is the Director of the Laboratory for Image and Video Engineering LIVE He has published over 400 technical articles in the general area of image and video processing and holds two U S patents Dr Bovik was Distinguished Lecturer of the IEEE Signal Processing Society 2000 received the IEEE Signal Processing Society Meritorious Service Award 1998 the IEEE Third Millennium Medal 2000 and twice was a two time Honorable Mention winner of the international Pattern Recognition Society Award He is a Fellow of the IEEE was Editor in Chief of the IEEE Transactions on Image Processing 1996 2002 has served on and continues to serve on many other professional boards and panels and was the Founding General Chairman of the IEEE International Conference on Image Processing which was held in Austin Texas in 1994 No other resource for image and video processing contains the same breadth of up to date coverage Each chapter written by one or several of the top experts working in that area Includes all essential mathematics techniques and algorithms for every type of image and video processing used by electrical engineers computer scientists internet developers bioengineers and scientists in various image intensive disciplines **Encyclopedia of Optical and Photonic Engineering (Print) - Five Volume Set**

Craig Hoffman, Ronald Driggers, 2015-09-22 The first edition of the Encyclopedia of Optical and Photonic Engineering provided a valuable reference concerning devices or systems that generate transmit measure or detect light and to a lesser degree the basic interaction of light and matter This Second Edition not only reflects the changes in optical and photonic engineering that have occurred since the first edition was published but also Boasts a wealth of new material expanding the encyclopedia's length by 25 percent Contains extensive

updates with significant revisions made throughout the text Features contributions from engineers and scientists leading the fields of optics and photonics today With the addition of a second editor the Encyclopedia of Optical and Photonic Engineering Second Edition offers a balanced and up to date look at the fundamentals of a diverse portfolio of technologies and discoveries in areas ranging from x ray optics to photon entanglement and beyond This edition s release corresponds nicely with the United Nations General Assembly s declaration of 2015 as the International Year of Light working in tandem to raise awareness about light s important role in the modern world Also Available Online This Taylor E mail e reference taylorandfrancis com International Tel 44 0 20 7017 6062 E mail online sales tandf co uk

### **Blind Image Deconvolution**

Subhasis Chaudhuri,Rajbabu Velmurugan,Renu Rameshan,2014-09-22 Blind deconvolution is a classical image processing problem which has been investigated by a large number of researchers over the last four decades The purpose of this monograph is not to propose yet another method for blind image restoration Rather the basic issue of deconvolvability has been explored from a theoretical view point Some authors claim very good results while quite a few claim that blind restoration does not work The authors clearly detail when such methods are expected to work and when they will not In order to avoid the assumptions needed for convergence analysis in the Fourier domain the authors use a general method of convergence analysis used for alternate minimization based on three point and four point properties of the points in the image space The authors prove that all points in the image space satisfy the three point property and also derive the conditions under which four point property is satisfied This provides the conditions under which alternate minimization for blind deconvolution converges with a quadratic prior Since the convergence properties depend on the chosen priors one should design priors that avoid trivial solutions Hence a sparsity based solution is also provided for blind deconvolution by using image priors having a cost that increases with the amount of blur which is another way to prevent trivial solutions in joint estimation This book will be a highly useful resource to the researchers and academicians in the specific area of blind deconvolution

### **Motion-Free Super-Resolution**

Subhasis Chaudhuri,Joshi Manjunath,2006-06-20 Motion Free Super Resolution is a compilation of very recent work on various methods of generating super resolution SR images from a set of low resolution images The current literature on this topic deals primarily with the use of motion cues for the purpose of generating SR images These cues have it is shown their advantages and disadvantages In contrast this book shows that cues other than motion can also be used for the same purpose and addresses both the merits and demerits of these new techniques Motion Free Super Resolution supersedes much of the lead author s previous edited volume Super Resolution Imaging and includes an up to date account of the latest research efforts in this fast moving field This sequel also features a style of presentation closer to that of a textbook with an emphasis on teaching and explanation rather than scholarly presentation

## **Iterative Identification And Restoration Of Images Introduction**

Iterative Identification And Restoration Of Images Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Iterative Identification And Restoration Of Images Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Iterative Identification And Restoration Of Images : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Iterative Identification And Restoration Of Images : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Iterative Identification And Restoration Of Images Offers a diverse range of free eBooks across various genres. Iterative Identification And Restoration Of Images Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Iterative Identification And Restoration Of Images Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Iterative Identification And Restoration Of Images, especially related to Iterative Identification And Restoration Of Images, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Iterative Identification And Restoration Of Images, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Iterative Identification And Restoration Of Images books or magazines might include. Look for these in online stores or libraries. Remember that while Iterative Identification And Restoration Of Images, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Iterative Identification And

Restoration Of Images eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Iterative Identification And Restoration Of Images full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Iterative Identification And Restoration Of Images eBooks, including some popular titles.

## **FAQs About Iterative Identification And Restoration Of Images Books**

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Iterative Identification And Restoration Of Images is one of the best book in our library for free trial. We provide copy of Iterative Identification And Restoration Of Images in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Iterative Identification And Restoration Of Images. Where to download Iterative Identification And Restoration Of Images online for free? Are you looking for Iterative Identification And Restoration Of Images PDF? This is definitely going to save you time and cash in something you should think about.
