Gupta, 2020-01-01 What if you had a guidebook that you could turn to at each stage of your academic journey to help you navigate through the process of getting a PhD in Biblical Studies and succeeding in the academic world This book is precisely intended to fill that need From theory to practice you will find discussions and answers to the most pertinent and pressing questions that prospective and current doctoral students are faced with How do I choose a program How can I gain admission into an elite program How do I choose a research topic Alongside the big questions about the process there are also a host of smaller matters How do I publish an article What conferences are out there in my field Where do I start looking for a job How do I get teaching experience How do I write a syllabus This guidebook tackles all of these questions and many more in three parts Prepare focuses on getting into a PhD program Succeed guides you through the doctoral program especially the writing of the dissertation and Advance treats issues that relate to success in the academic world such as conference participation publishing employment and best practices in teaching Innovations and Technologies for Soft Skill Development and Learning Nagarajan, Suresh Kumar, R., Mohanasundaram, 2020-04-10 Traditional education revolves around the teaching of technical skills especially within STEM fields However soft skills broadly communication and intrapersonal skills are essential within all fields especially those frequently involving research and collaboration However the focus on teaching students to be adept communicators and team members remains woefully underdeveloped Innovations and Technologies for Soft Skill Development and Learning is a pivotal reference source that explores the mental and psychological growth of individual learners at different stages of education concerning soft skills and the need for innovation and creativity to lead a successful career Highlighting topics including higher education emotional intelligence and student behavior this book is ideally designed for educators curriculum developers instructional designers administrators policymakers academicians researchers and students **Science and Technology in Homeric Epics** S. A. Paipetis, 2008-10-20 In the Homeric Epics important references to specific autonomous systems and mechanisms of very advanced technology such as automata and artificial intelligence as well as to almost modern methods of design and production are included Even if those features of Homeric science were just poetic concepts which on many occasions does not explain the astonishing details of design and manufacture like the ones included in the present volume they seem to prove that these achievements were well within human capability In addition the substantial development of machine theory during the early post Homeric age shows that the Homeric descriptions were a kind of prophetic conception of these machines and scientific research must be a quest for the fundamental principles of knowledge available during the Late Bronze Age and the dawn of the Iron Age Such investigations must of necessity be strongly interdisciplinary and also proceed continuously in time since as science progresses new elements of knowledge are discovered in the Homeric Epics amenable to scientific analysis This book brings

together papers presented at the international symposium Science and Technology in Homeric Epics which took place at Ancient Olympia in 2006 It includes a total of 41 contributions mostly original research papers covering diverse fields of science and technology in the modern sense of these words CD-ROMs in Print ,2003 Swans of the World Alice L.
