Economics for Lawyers Richard A. Ippolito, 2012-01-12 Whether dealing with contracts tort actions or government regulations lawyers are more likely to be successful if they are conversant in economics Economics for Lawyers provides the essential tools to understand the economic basis of law Through rigorous analysis illustrated with simple graphs and a wide range of legal examples Richard Ippolito focuses on a few key concepts and shows how they play out in numerous applications There are everyday problems What is the social cost of legislation enforcing below market prices minimum wages milk regulation and noncompetitive pricing Why are matinee movies cheaper than nighttime showings And then there are broader questions What is the patent system's role in the market for intellectual property rights How does one think about externalities like airport noise Is the free market a regulated solution or tort law the best way to deliver the efficient amount of harm in the workplace What is the best approach to the question of economic compensation due to a person falsely imprisoned Along the way readers learn what economists mean when they talk about sorting signaling reputational assets lemons markets moral hazard and adverse selection They will learn a new vocabulary and a whole new way of thinking about the world they live in and will be more productive in their professions **Forthcoming Books** Rose Arny, 2002-04

*Green Transportation Logistics* Harilaos N. Psaraftis, 2015-07-13 This book examines the state of the art in green transportation logistics from the perspective of balancing environmental performance in the transportation supply chain while also satisfying traditional economic performance criteria Part of the book is drawn from the recently completed European Union project Super Green a three year project intended to promote the development of European freight corridors in an environmentally friendly manner Additional chapters cover both the methodological base and the application context of green transportation logistics Individual chapters look at the policy context the basics of transportation emissions Green Corridors basics the concept of TEN T Trans European Network Benchmarking of green corridors the potential role of ICT Information and Communication Technologies Green vehicle routing Reducing maritime CO2 emissions via market based measures and speed and route optimization Sulphur emissions Lifecycle emissions Green rail transportation Green air transportation Green inland navigation and possible areas for further research Throughout the book pursues the goal of win win solutions and analyzes the phenomenon of push down pop up wherein a change in one aspect of a problem can cause another troubling aspect to arise For example speed reduction in maritime transportation can reduce emissions and fuel costs but could require additional ships and could raise in transit inventory costs Or regulations to reduce sulphur emissions may ultimately increase CO2 elsewhere in the supply chain The book takes stock at the various tradeoffs that are at stake in the goal of greening the supply chain and looks at where balances can be struck **Books in Print Supplement**, 2002
