**Antler, Bone & Shell Artifacts** Lar Hothem,2005-11-15 The finest North American Indian artifacts were made of organic materials and luckily many survive Materials used include the most common bone plus antler shell fur ivory and horn Artifact classes range from projectile points and awls to fishhooks gorgets beads and more Collectors today value such pieces because of their artistic beauty and rarity Most of them were destroyed by natural processes over the centuries so those that remain are treasured Lar Hothem author of the bestselling five volume series Indian Artifacts of the Midwest has once again produced a fantastic book for Indian artifacts collectors Each artifact includes information on type or class material size find location and in most cases an estimated value Background information is included about these artifacts including finds made throughout North America Advertisements from early dealers are listed as well as recent auction results This book opens the window to a fascinating world of study and collecting 2006 values

**Central States Archaeological Journal** Central States Archaeological Group,2008 [The Complete Guide to Vintage Children's Records](#) Peter Muldavin,2007 The coverage is mainly of 78rpm records however a few early 45rpm records are included Unlike previous price guides this book attempts to cover all 78rpm kiddie records made in the USA The dates of coverage range from the 1890s to the 1960s with most listings from the 1940s and 1950s Cover back

**Indian Bannerstones and Related Artifacts** Lar Hothem,James R. Bennett,2009 Begun by the late Lar Hothem and completed by James R Bennett this co authored identification and value guide focuses on the very popular and often ornate Indian bannerstone artifacts of ancient America With several hundred full color photographs representing some of America s most famous bannerstone collections Indian Bannerstones Related Artifacts gives collectors an in depth look at hundreds of the most prized ancient weapon components collected in modern times including many rare and valuable examples

*Indians of North America* Marilyn L. Haas,1983 Guide to the literature on North American Indians Includes annotated bibliography arranged by topic and unannotated bibliography arranged alphabetically by tribe Some Canadian material included

**North American Indian Artifacts** Lar Hothem,1994 This Collector s identification and value guide is completely revised with 2 000 new photos and updated pricing Fully illustrated showing many pieces in full color

**Collector's Guide to Indian Pipes** Lar Hothem,1999 This unique value guide showcases highly personal well made smoking instruments Informational sections on how pipes were made what to look for and what to avoid when collecting pipes Other pipe facts and finds are also included Over 1 000 color photos

**A Guide to Basic Archaeological Field Procedures** Knut R. Fladmark,1978 [The Arkansas Amateur](#) ,1966 **Subject Guide to Books in Print** ,1996

**Stone, Bone, Antler & Shell** ,1996 This book is for anyone who has looked at artifacts from the Northwest Coast in a museum and wondered How were these made What was their function How were they used Hilary Stewart lifts artifacts out of their isolation in a glass case and puts them into the context of the life of early native people on the coast Archaeological excavations or digs have unearthed an array of ancient artifacts While items made of perishable

materials such as wood bark and hide usually decayed over time many objects of stone bone antler and shell have been found In clear easy to read text and over 1000 illustrations and 50 photos Hilary Stewart depicts a wide range of artifacts These tools weapons hunting and fishing gear household and ceremonial items and ornaments reveal much about a people s way of life how they fed clothed adorned and housed themselves their technologies skills and art their trading and travelling patterns

**American Antiquity**, 1952    **Studies in Bella Bella Prehistory** James J. Hester, Sarah M. Nelson, 1978  
Excavations primarily at Namu ElSx 1 yielded the deepest continuum of dated cultural deposits of any coastal site with a 9000 year sequence Description analysis and interpretation of the material is offered in a series of papers

**Paleo-Indian Artifacts** Lar Hothem, 2007    **Bone, Antler, Ivory and Horn** Arthur MacGregor, 2014-10-30 Artefacts made from skeletal materials since the Roman period were before this book neglected as a serious area of study This is a comprehensive account which reviews over fifty categories of artefact The book starts with a consideration of the formation morphology and mechanical properties of the materials and illuminates characteristics concerning working with them Following chapters

discuss the organisation of the industry and trade in such items including the changing status of the industry over time Archaeological evidence is combined with that from historical and ethnological sources with many illustrations providing key visual reference Originally published in 1985    **Bone and Antler Artifacts**, 1978    **Bone, Antler, Tooth and Shell** James Bruce Jamieson, 2016 Osseous artifacts have not been given the attention they deserve by most Iroquoian researchers While a general system for their classification has evolved over the past one hundred plus years labels have been assigned to artifacts based on very general characteristics This dissertation addresses this shortcoming by undertaking a much more detailed analysis of their morphological and metric attributes It refines the existing classificatory terminology and provides the foundation for a much more standardized typology which can be used and further refined by Iroquoian researchers in the future The analysis also tests the hypothesis that the sites exhibit significant differences For example while all five sites are roughly contemporaneous they are located in two different micro environments and are related to two different cultural traditions one site is a special purpose fishing camp This dissertation explores the similarities and differences between the five sites osseous artifact assemblages and identifies variations that may be attributable to special site functions differences in environment subsistence patterns or cultural affiliation

**The Technological Role of Bone and Antler Artifacts on the Lower Columbia** Kristen Ann Fuld, 2012 This thesis explore the technological role of bone and antler artifacts from two contact period southern Northwest coast archaeological sites the Cathlapotle site 45CL1 and the Meier site 35CO5 Technological measures of sedentism are based on lithics and predict residential sedentism promotes technological expediency in hunter gatherers Parry and Kelley 1987 Cathlapotle and Meier lithic assemblages consist of expedient and opportunistic assemblages and raw material stockpiles with the exception of highly curated projectile points and endscrapers

Hamilton 1994 The expectation that residential sedentism promotes technological expediency in hunter gatherers was tested

on the Cathlapotle and Meier bone and antler artifact assemblages in two ways First curation and expediency were recorded for each artifact by measuring level of energy investment in manufacture or degree of working Second a spatial analysis was used to explore methods of artifact storage and disposal Results revealed both Cathlapotle and Meier osseous assemblages are highly curated except for expedient awls and flakers Specifically artifact classes related to subsistence procurement modification including woodworking and ornamentation were highly curated Both sites contain stockpiles of unmodified bone and antler The spatial analysis showed level of curation did not affect artifact disposal method Despite this some patterns were evident At Cathlapotle curated procurement and modification artifacts expedient awls as well as worked fragments were concentrated outside the houses specifically in Sheet Midden Broken modification artifacts ornaments and detritus were randomly distributed At the Meier site curated procurement and modification artifacts as well as expedient awls were randomly distributed Broken modification artifacts detritus and worked fragments were concentrated outside the houses Ornaments were concentrated in the northern segment elite area of the house There were also significantly more curated complete tools recovered from the cellar facility while significantly fewer curated complete tools were recovered from the midden facility at Meier In this thesis the effects of contact on osseous assemblages were examined It is an assumption of North American archaeologists that European introduced metals replace and or change the character of traditional technologies such as lithic and osseous technologies Few quantitative studies comparing pre and postcontact artifact assemblages exist Bamforth 1993 Cobb 2003 In some parts of northeast North America European contact is followed by a proliferation of osseous tool working and over time osseous artifacts drop out of the archaeological record Snow 1995 1996 Cathlapotle and Meier were occupied from AD 1400 to AD 1830 spanning European contact People at Cathlapotle were in direct contact with Europeans and Euro Americans since 1792 Boyd 2011 Previously it was assumed Cathlapotle was more involved in the fur trade than Meier because Cathlapotle was mentioned several times in ethnohistoric accounts while Meier was never mentioned Also Cathlapotle contains far more historic trade items than Meier Ames 2011 The assumption that European introduced metals replace and or change the character of traditional technologies was tested on the Cathlapotle and Meier assemblages by comparing artifact frequency density and assemblage diversity of pre and postcontact assemblages Results show contact is reflected in the osseous assemblages at both Cathlapotle and Meier Contact is evident but is reflected in different ways At Cathlapotle artifact frequencies densities and assemblage diversity decrease postcontact In contrast at Meier artifact frequencies and densities increase postcontact with some artifact classes tripling or quadrupling in frequency The introduction of metal could have enabled people to work osseous materials faster and easier decreasing manufacture time cost and overall energy investment The gain in efficiency promoted the proliferation of bone working and an abundance of osseous tools at the Meier site These results encourage a reevaluation of Meier s role in the fur trade At Cathlapotle metal objects may have replaced osseous tools resulting in the decline of bone and antler working and or activity

patterns shifted away from activities requiring osseous tools. The results of this thesis deviate from typical Northwest Coast bone and antler assemblages challenge technological models of sedentism that are based on lithics and contradict assumptions of Lower Columbians involvement in the fur trade. *Art and Artifacts of Bone and Antler in the Lower Ganges Valley* Prasanta Kumar Mandal, 1993. **Approaches to Classification of Oneota Bone and Antler Artifacts** Jacob E.
