Brief Dynamic Interpersonal Therapy A Clinicians Guide:

Brief Dynamic Interpersonal Therapy Alessandra Lemma, Mary Hepworth, Peter Fonagy, Patrick Luyten, Deborah Abrahams, 2024-12-19 Dynamic Interpersonal Therapy DIT is a brief psychodynamic psychotherapy developed for the treatment of mood disorders It is now offered in the UK in NHS for the treatment of depression and has been applied worldwide in public health care settings as well as private settings This book is a user friendly practical guide for the implementation of a brief psychodynamic intervention in routine clinical practice as well as in research protocols It has been substantially updated since the first edition in 2011 with the addition of 5 new chapters to reflect new applications of the model in complex care for patients with functional and somatic disorders and for internet delivered DIT and it outlines the changes in the training of DIT practitioners It sets out clearly the theoretical framework as well as the rationale and strategies for applying DIT with patients presenting with mood disorders depression and anxiety Throughout it is illustrated with detailed examples that help the reader to implement the approach in their practice The book will be required reading to support training initiatives in DIT as well as providing a resource for mental health professionals specialising in psychodynamic psychotherapy and wishing to work within a limited time frame

Brief Dynamic Interpersonal Therapy Alessandra Lemma, 2011 **Concise Guide to Brief Dynamic and Interpersonal Therapy** Hanna Levenson, Stephen F. Butler, Theodore A. Powers, Bernard D. Beitman, 2008-08-13 In today's world of managed care characterized by limited mental health resources emphasis on accountability concerns of third party payers and consumer need the demand for mental health professionals to use briefer therapeutic approaches is on the rise Fully 84% of all clinicians are doing some form of planned brief therapy 6-20 sessions per year per patient Yet despite clinical advances and outcome data that demonstrate the effectiveness of short term therapy many therapists in fact 90% of those whose theoretical orientation is psychodynamic rather than cognitive behavioral are reluctant to learn briefer interventions seeing value only in long term depth oriented work The second edition of this Concise Guide is intended to help educate both beginning and experienced clinicians in the strategies and techniques of time attentive models and to foster more positive and optimistic attitudes toward using these important therapies The seven therapeutic models presented here including an entirely new chapter on time limited group therapy highlight the importance of the interpersonal perspective The seven models one per chapter represent well established short term approaches to clinical issues that therapists commonly encounter in their clinical practices These models also have clearly defined intervention techniques and formulation strategies and can be used within the 10 to 20 session time frame of most managed care settings The first part of each chapter dealing with a therapeutic model lists the various presenting problems the authors deem most suitable for treatment by that particular approach The authors discuss the overall framework of each model selection criteria goals therapeutic tasks and strategies empirical support and relevance for managed care with clinical cases to illustrate the application of each model The authors include updated chapters on

supportive time limited and interpersonal therapies time limited dynamic psychotherapy short term dynamic therapy for patients with posttraumatic stress disorder brief dynamic therapy for patients with substance abuse disorders an entirely new chapter on time limited group therapy and a final chapter on the reciprocal relationship between pharmacotherapy and psychotherapy Meant to complement the more detailed information found in lengthier psychiatric texts this Concise Guide it is designed to fit into a jacket or lab coat pocket is a practical and convenient reference for psychiatrists psychiatric residents and medical students working in a variety of treatment settings such as inpatient psychiatry units outpatient clinics consultation liaison services and private offices

An Integrated Approach to Short-Term Dynamic Interpersonal Psychotherapy Joan Haliburn, 2018-03-26 Short term dynamic interpersonal psychotherapy is an integrated trauma informed contemporary dynamic way of working with a range of mental health difficulties Flexible though structured phase oriented focused and time limited it is informed by the Conversational Model Attachment and Interpersonal Theories and Brief Psychodynamic Psychotherapies which are briefly described It provides clinicians with a way of working with patients whose difficulties do not warrant long term therapy who prefer a talking therapy or who have failed cognitive behaviour therapies With the help of examples it guides the process of assessment and therapy with trauma in mind using Conversational Model techniques where empathy replaces confrontation resistance is seen as a fear of re traumatization defence mechanisms are regarded as adaptive coping mechanisms which later become maladaptive transference interventions replace interpretations and self reflective capacity is encouraged rather than just insight Separation anxiety is addressed and anxiety provoking techniques are avoided given that anxiety is a large part of most presentations
