First-Year University Writing L. Aull,2015-03-04 First Year Writing describes significant language patterns in college writing today how they are different from expert academic writing and how to inform teaching and assessment with corpus based linguistic and rhetorical genre analysis

Academic Writing and Genre Ian Bruce,2008-04-07 The focus of this book is the use of genre based approaches to teaching academic writing. Genre based courses enable second language learners to integrate their linguistic organisational and contextual knowledge in a variety of different tasks. The book reviews pedagogical approaches to genre through English for Specific Purposes and Systemic Functional Linguistics to present a synthesis of the current research being undertaken in the field. From this theoretical base Ian Bruce proposes a new model of genre based approaches to academic writing and analyses the ways in which this can be implemented in pedagogy and curriculum design. Academic Writing and Genre is a cutting edge monograph which will be essential reading for researchers in applied linguistics

Current Issues in Phraseology Sebastian Hoffmann,Bettina Fischer-Starcke,Andrea Sand,2015-07-15 In this stimulating collection of papers leading researchers from Europe and North America demonstrate the theoretical and methodological importance of corpus studies of phraseology and show how data intensive case studies provide new perspectives on language use. One of the main theoretical findings of recent linguistics is that phraseology is central to language organization. The authors show how software and statistical techniques can reveal phraseological patterns in different text types literary, academic and commercial and also typical paths of language change across the last 200 years. These patterns are revealed only when computational methods are applied to corpora consisting of hundreds of millions of running words collected from thousands of authentic texts. A major feature of the book is its critical comparison and evaluation of different quantitative and statistical tools which readers can use for their own empirical work. Language, Corpora, and Technology in Applied Linguistics Muhammad Afzaal,Swaleha Bano Naqvi,Geng Qiang,2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of

keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world
