

• **What is the main reason for the high rate of migration in the region?**

• **Wetland**: A wetland is a land area that is saturated with water for long periods of time. It is characterized by soil that is water-saturated or waterlogged, and by vegetation that is adapted to such conditions. Wetlands are often referred to as "the kidneys of the earth" because they filter and purify water, store carbon, and provide habitat for many species of plants and animals.
