**Basic Physics** Jamaine Donaldson, 2020-12-10 Everything around us uses energy in one way or another. Our automobiles, planes, and trains burn fuel; our computers require electrical sources and Wi-Fi connections; and our telecommunication. Physics is perhaps the broadest and richest of all the sciences. And in terms of everyday phenomenon, it is among the most relevant to people. For example, the physics of sports is a very popular subject on this website. Many people play sports, and it is natural for some of them to seek out the physics of the particular sport they are interested in. People who are not otherwise interested in physics will be interested in the physics behind the sport they are playing; devices operate on cellular signals. Essentially, with our expanded capabilities has come an increased need for new forms of energy, and this may be nuclear power or alternative energy sources such as fossil fuels or hybrid power. With a comprehensive review of physics, your child can broaden their mind with theories and exciting experiments.
